Detente In Europe The Soviet Union And The West Since 1953:

Détente in Europe John Van Oudenaren, 1991 The monumental events in Eastern Europe and the Soviet Union must be understood Jan Van Oudenaren argues in the context of a process of East West détente begun in 1953 in the aftermath of Stalin's death Van Oudenaren's comprehensive and timely study examines the development of Soviet Western détente from the death of Stalin to the unification of Germany In redefining détente as a process rather than a code of conduct Van Oudenaren looks to its origins in Soviet policy earlier than previously identified and analyzes both its history and character His study explores the restoration of four power negotiations in Germany and Austria in the mid 1950s their subsequent breakdown in the Berlin crisis their unexpected revival in 1990 in the form of two plus four talks on German unity and the future of the Soviet Union as a European power Among the key elements of détente discussed are diplomacy particularly the role of summit conferences cooperation among parliaments political parties and trade unions arms control economic relations and links among cultural institutions churches and peace movements *A State of Peace in Europe* Petri Hakkarainen, 2011-12 Chapter 1 introduction era of negotiations chapter 2 1966-69 incubation of strategies chapter 3 1969-70 bilateral leverages and European security chapter 4 1970-71 transition to Western multilateralism chapter 5 1971-72 towards a European peace order chapter 6 1972-75 Deutschlandpolitik at the conference chapter 7 conclusion evolution instead of revolution sources and bibliography index *Europe Since 1945* Mary Fulbrook, 2001 This text brings home the waves of transformation that have washed across Europe in the second half of the 20th century sketching out general patterns of this change and exploring some of the local themes and variations in parts of Europe *International History of the Twentieth Century and Beyond* Antony Best, Jussi M. Hanhimäki, Joseph A. Maiolo, Kirsten E. Schulze, 2024-09-03 Now in its fourth edition this highly successful global history of the twentieth century is written by four prominent international historians for first year undergraduate level and upward Using their thematic and regional expertise the authors have produced an authoritative yet accessible and seamless account of the history of international relations in the last century covering events in Europe Asia the Middle East Africa and the Americas They focus on the history of relations between states and on the broad ideological economic and cultural forces that have influenced the evolution of international politics over the last 120 years The fourth edition is thoroughly updated to take account of the most recent research and global developments including new material on the impact of the Trump administration on international politics the rise of China under the leadership of Xi Jinping and the origins of the wars in Ukraine and Gaza The book is supported by a fully revised companion website including links to further resources and self testing material which can be found at www.routledgelearning.com/internationalhistory20c **The German Problem Transformed** Thomas Banchoff, 2010-05-06 Does the new more powerful Germany pose a threat to its neighbors Does the new German Problem resemble the old The German Problem Transformed addresses these questions fifty years after the founding of the Federal Republic and ten years after the fall of the Berlin Wall

Many observers have underscored the reemergence of Germany as Europe's central power. After four decades of division, they contend Germany is once again fully sovereign without the strictures of bipolarity; its leaders are free to define and pursue national interests in East and West. From this perspective, the reunified Germany faces challenges not unlike those of its unified predecessor a century earlier. *The German Problem Transformed* rejects this formulation. Thomas Banchoff acknowledges post-reunification challenges but argues that postwar changes, not prewar analogies, best illuminate them. The book explains the transformation of German foreign policy through a structured analysis of four critical postwar junctures: the cold war of the 1950s, the détente of the 1960s and 1970s, the new cold war of the early 1980s, and the post-cold war 1990s. Each chapter examines the interaction of four factors: international structure and institutions, foreign policy ideas, and domestic politics in driving the direction of German foreign policy at a key turning point. This book will be of interest to scholars and students of German history, German politics, and European international relations, as well as policymakers and the interested public. Thomas Banchoff is Assistant Professor of Government, Georgetown University.

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03. This 2-volume work includes approximately 1,200 entries in A-Z order, critically reviewing the literature on specific topics from abortion to world systems theory. In addition, nine major entries cover each of the major disciplines: political economy, management and business, human geography, politics, sociology, law, psychology, organizational behavior, and the history and development of the social sciences in a broader sense. *John F. Kennedy and the "Thousand Days"* Manfred Berg, Andreas Etges, 2007. Although it lasted only for a Thousand Days, the presidency of John F. Kennedy is considered a defining moment in recent American history. Despite countless attempts by historians, journalists, and cultural critics to carefully craft during his lifetime and eagerly nurture after his violent death, the notion that America might have been spared many of the traumatic events of the 1960s and 1970s if only John F. Kennedy had lived poses a continuing challenge to historians to reassess his foreign and domestic policies. In this volume, scholars from the United States, Germany, and Great Britain, mostly representatives of a younger generation, take a fresh look at key topics such as Kennedy's policies toward Europe, the Third World, the civil rights struggle, and poverty. Contrary to his often grandiose rhetoric of vigorous leadership and new frontiers, and despite his considerable skills at managing foreign and domestic crises, the essays emphasize that President John F. Kennedy acted largely within the consensus of Cold War liberalism.

American Foreign Relations Since 1600 Robert L. Beisner, 2003. In this book, a team of distinguished historians has culled the most important published and unpublished works in U.S. diplomatic literature and thoroughly annotated them. The work comprehensively covers five centuries from America's colonial era to the end of the 20th century, with half the entries on works published since the first edition and nearly half on post-World War II subjects.

Political science quarterly, 1992. **The Fall of the Soviet Empire** Anne de Tinguy, 1997. Was the Soviet system's failure inevitable from its inception? These essays consider the role of ideology, the failure of the economic

system and the failure of a messianic ambition **European Solidarity with Chile, 1970s-1980s** Kim Christiaens, 2014

The overthrow of the democratically elected government of Salvador Allende and the coming to power of a military regime led by Augusto Pinochet on 11 September 1973 drew worldwide attention towards Chile. The political repression shook the world and ignited one of the largest social movements of the 1970s and 80s. Hundreds of solidarity committees and a gamut of human rights and justice organizations mobilized thousands of people. This volume offers a compelling insight into the exceptional impact that the Chilean crisis made in Western and Eastern Europe. In doing so it provides a new and broader perspective into the history of the Cold War transnational activism and human rights.

European defence community, lessons for the future? Michel Dumoulin, 2000. L'année 1950 l'idée de créer une Communauté Européenne de Défense (CED) est contemporaine de celle de fonder une Communauté Européenne du Charbon et de l'Acier (CECA). Mais le projet est une gageure. Il heurte les cultures nationales en matière de défense, suscite de violentes réactions. Du point de vue de la perspective de voir se cotoyer des ennemis d'hier au sein des mêmes unités, d'enclencher l'opposition, la standardisation du matériel, hârisse les adversaires d'une liaison entre la CED et la construction d'une Europe politique. Devant une telle variété de facteurs visant à expliquer la mort du projet le 30 août 1954, certains ont parlé d'un meurtre collectif. Page d'histoire le projet de CED et son échec n'en constituent pas moins aujourd'hui une référence qui donne matière à réflexion sur cette question que l'on se plaît à considérer comme vitale pour l'avenir de l'Europe la s'inscrit commune. In 1950, in parallel with the plans for the foundation of the European Coal and Steel Community (ECSC), there first grew the idea for creating a European Defence Community (EDC). But the project was not a success. It conflicted with the various national defence cultures, sparked off violent reactions against the alignment of former enemies within a single unit, unleashed opposition to the standardisation of equipment and raised the hackles of those opposed to a bond between the EDC and the construction of a political Europe. In the face of so many different factors contributing to the project's death on 30 August 1954, there was even talk in certain quarters of a collective murder. As an important event in history, the EDC project and its failure still have echoes today, causing us all to ponder a question which is universally considered as crucial to the future of Europe: a common security policy.

Contains articles that provide information about 747 historical and modern day treaties to which colonial America and the United States have been party, each with the dates signed and ratified, signatories, an overview and a discussion that in some cases includes extensive quotations from the actual text of the document.

National Reconciliation in Eastern Europe Henry F. Carey, 2003. This book presents thirteen articles by leading scholars offering different approaches to mediating, facilitating and resolving ethnic and class tensions based on case studies in Hungary, Bulgaria, the Baltic States and Yugoslavia. Among the topics discussed are higher education, the role of women, nationalism, minorities and religion.

Winston Churchill's Last Campaign John W. Young, 1996. Largely because of his famous Iron Curtain speech, Churchill is often remembered as a determined Cold Warrior. Yet for all his fervent anti-

communism he saw the creation of the Western Alliance as a step not towards war but towards negotiations with the USSR John Young shows how as Prime Minister in the 1950s he hoped for a summit meeting with Soviet leaders an end to the Cold War and an era of peaceful scientific advancement by humankind He examines the reasons why Churchill failed in this his last great political campaign reasons which included his own failing health the scepticism of allies abroad and the opposition of his ministers at home Nonetheless argues the author the outlook which Churchill developed in the first decade of the Cold War made him the father of the European detente This is the first full critical analysis of the issue which dominated the last active years of one of the greatest statesmen of the twentieth century *Bibliography of the Soviet Union, Its Predecessors and Successors* Bradley L.
