Deterrence And Defense:

Deterrence and Defense Glenn Herald Snyder, 2015-12-08 In the literature of diplomacy and military strategy there has long been a gulf between the concepts of deterrence and defense Glenn Snyder bridges this gulf offering a systematic analysis of the two ideas with the aim of integrating them in a framework of theory He proposes criteria for making rational decisions in national security policy and deals with the critical issue of the balance between deterrence of and defense against military attacks The author augments the scattered literature on the subject with original contributions on this increasingly important facet of international relations Originally published in 1961 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Deterrence and Defense Glenn Herald Snyder, 1961 *Deterrence and Defense* Glenn H. Snyder, 1963 The Future of Extended Deterrence Stéfanie von Hlatky, Andreas Wenger, 2015-08-04 Are NATO's mutual security commitments strong enough today to deter all adversaries Is the nuclear umbrella as credible as it was during the Cold War Backed by the full range of US and allied military capabilities NATO's mutual defense treaty has been enormously successful but today's commitments are strained by military budget cuts and antinuclear sentiment The United States has also shifted its focus away from European security during the wars in Afghanistan and Iraq and more recently with the Asia rebalance Will a resurgent Russia change this The Future of Extended Deterrence brings together experts and scholars from the policy and academic worlds to provide a theoretically rich and detailed analysis of post Cold War nuclear weapons policy nuclear deterrence alliance commitments nonproliferation and missile defense in NATO but with implications far beyond The contributors analyze not only American policy and ideas but also the ways NATO members interpret their own continued political and strategic role in the alliance In depth and multifaceted The Future of Extended Deterrence is an essential resource for policy practitioners and scholars of nuclear deterrence arms control missile defense and the NATO alliance

Deterrence and Defense in a Nuclear, Biological, and Chemical Environment Robert G. Joseph, 1995 **From Deterrence to Engagement** Terence Roehrig, 2006-02-20 From Deterrence to Engagement provides a comprehensive examination of the U S South Korea defense relationship from 1945 to the present Using deterrence theory as its framework this work explores the evolving nature of U S interests in a region that became a focal point only after the North Korean invasion in 1950 Author Terence Roehrig addresses the changing nature of the threats to U S interests in Korea especially North Korea's buildup and its efforts to acquire nuclear weapons and examines specific measures utilized by the United States to implement its deterrence policy While U S policy regarding Korea has changed over the years this timely and

important work argues that although the U S commitment to protect its ally has been credible and effective the same cannot be said for its attempts to prevent North Korean nuclear proliferation From Deterrence to Engagement is certain to find an audience amongst scholars of defense policy national security and Korean security relations **Strategic Impasse** Stephen J. Cimbala, 1989-08-23 There is probably no area of more crucial concern nor one more subject to possible misunderstanding and riddled with paradox than nuclear weapons and their use not only in war but as deterrents to war In Strategic Impasse Cimbala examines the critical issues problems and paradoxes inherent in the current nuclear situation It is from a fundamental contradiction the usefulness of nuclear weapons versus the undesirability of nuclear war that nuclear deadlock arises Their usefulness as deterrents is based on their destructive potential and the balance of power in Europe cannot be adjusted until the inflexible bipolar balance of terror is addressed Ironically superpower sovereignty in nuclear first strike retaliation capability shared across the divided East West political buffer zone created the impetus for improvements in conventional warfare To the extent war can be contained below the nuclear threshold conventional weaponry contributes to deterrence by denial One difficulty lies in the improbability of completely isolating the nuclear from the conventional battlefield in a European scenario Also a level of superpower force perceived to be adequate in peacetime might prove to be an inadequate intrawar deterrent Because of the underdevelopment of conceptual frameworks credible deterrence the creation of nuclear campaigns designed to prevent war remains conjectural Highly usable weapons require a command system that can provide for simultaneous fighting and escalation but escalation beyond a certain level conflicts with control and therefore usability In turn low expectations of weapon usability may weaken deterrence In Gorbachev s defensive sufficiency forces for aggression and surprise attack would be diminished while forces for defense would be strengthened The problem lies not only in differentiating between offensive and defensive weaponry but in achieving a consensus on such a definition by NATO s member countries The book is divided into three parts the first section Issues of Theory and Strategy scrutinizes the relationship between offense and defense and examines SDI and more inclusive strategic defense matters It also questions the connection between policy objectives and force and explores the complication of externalities such as relations with allies In section two Stretching Deterrence Cimbala reviews the operational art likely to be employed by the Soviets in a conventionally fought European war and defines and appraises the sensor cyber revolution in technology and its impacts on preferred strategies The final part Beyond Deterrence considers war termination scenarios and related issues including sociopolitical aspects surveys the part nuclear weapons play in superpower competition in the Third World and explains how issues of sovereignty effect deterrence avoidance and future super power relations Strategic Impasse will enable scholars and students of military affairs as well as political scientists and government officials to see beyond current nuclear rhetoric and to make informed judgments on an issue that fundamentally affects this nation s and the world s future

Permanent Deterrence Alexander Vershbow, Philip Breedlove, 2019-02-14 **Geometries of Deterrence** Hans

Binnendijk, Conor Rodihan, 2020-05-15 **Military Medical Ethics, Volume 1** , **U.S. Air Force Strategic Deterrence Capabilities in the 21st Century Security Environment** National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on U.S. Air Force Strategic Deterrence Capabilities in the 21st Century Security Environment: A Workshop, 2013-01-01 Changes in the 21st century security environment require new analytic approaches to support strategic deterrence Because current adversaries may be deterred from the use of nuclear weapons differently than were Cold War adversaries the Air Force needs an analytic process and tools that can help determine those Air Force capabilities that will successfully deter or defeat these new nuclear armed adversaries and assure U S allies While some analytic tools are available a coherent approach for their use in developing strategy and policy appears to be lacking Without a coherent analytic approach that addresses the nuances of today s security environment Air Force views of its strategic deterrence needs may not be understood or accepted by the appropriate decision makers A coherent approach will support Air Force decisions about its strategic force priorities and needs deter actual or potential adversaries and assure U S allies In this context the Air Force in 2012 requested that the Air Force Studies Board of the National Research Council undertake a workshop to bring together national experts to discuss current challenges relating strategic deterrence and potential new tools and methods that the Air Force might leverage in its strategic deterrence mission The workshop consisted of two 3 day sessions held in Washington DC on September 26 28 2012 and January 29 31 2013 and was attended by a very diverse set of participants with expertise in strategic deterrence and a range of analytic tools of potential interest to the Air Force U S Air Force Strategic Deterrence Capabilities in the 21st Century Security Environment summarizes this workshop **Military Medical Ethics** Anthony E. Conventional Defense and Total Deterrence Robert B. Killebrew, 1986 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com The Half War Robert P Haffa Jr, 2019-07-11 This book offers a strategic organizational and logistical analysis in a historical context of the planning of conventional forces to meet a limited contingency The central question is Why from 1960 to 1982 did the U S fail to construct a coherent limited contingency force Analysis of a series of comparative case studies reveals that the strategic concept to the half war or limited contingency was never articulated adequately enough to support specific force planning Organizations designed to oversee and command limited contingency forces fragmented by interservice rivalries and the absence of joint doctrine lacked multiservice composition and a unified command structure A search for economy in limited contingency forces seemed justified by illusions about their capabilities Low budgetary priority and Congressional perceptions that enhanced U S rapid deployment capabilities would encourage U S global intervention contributed to the lack of logistical and mobility systems dedicated to them The wider intent of this study is to shed light on the general purpose force planning process and to suggest policy

guidance as the United States once again embarks on a major conventional force planning initiative Rather than being trapped by the past new efforts to meet vital U S military interests below the nuclear threshold must identify half war planning contingencies structure unified commands capable of directing tailored conventional forces in specific theaters and provide adequate strategic mobility systems

Strategic Thinking, Deterrence and the US Ballistic Missile Defense Project Reuben Steff,2016-04-01 A systematic critical survey of American strategic thinking and the strategic culture in which it is formed In particular this book seeks to interrogate the theory and strategy of nuclear deterrence and its relationship to the concept of missile defence Drawing widely on the theoretical literature in international relations and strategic studies it identifies the key groups that have competed over America s nuclear policy post 1945 and examines how the concept of missile defence went through a process of gestation and intellectual contestation leading to its eventual legitimization in the late 1990s Steff sheds light on the individuals groups institutions and processes that led to the decision by the Bush administration to deploy a national missile defence shield Additionally Steff systematically examines the impact deployment had on the calculations of Russia and China In the process he explains that their reactions under the Bush administration have continued into the Obama era revealing that a new great power security dilemma has broken out This Steff shows has led to a decline in great power relations as a consequence

Information Warfare and Deterrence Gary F. Wheatley,Richard E. Hayes,1996 On one level Information Warfare IW and deterrence are well matched but on other levels the two topics can be seen as orders of magnitude apart IW covers a huge domain while deterrence is a narrow topic Their relationship is spotty highly relevant on some topics marginally so on others and not at all relevant in many areas The term information warfare typically focuses on the military or cyber war domains dominated by computers This narrow definition is inconsistent with the broad policy questions relevant to IW its impact from cooperation to competition and conflict and the key role of information media Deterrence is part of IW only when the attacker is known or can be discovered the defender has a credible capability to threaten important interests of the attacker and the attacker cannot defend those interests

National Security Crisis Forecasting And Management Gerald W. Hoppo,2019-03-08 This book identifies the central problems of crisis research assesses the progress of work in the area and discusses prospects for the future It addresses Soviet Chinese and U S crisis management patterns computer based early warning systems terrorism and the Rapid Deployment Force

U.S. Conventional Forces and Nuclear Deterrence Christopher Bolkcom,2025-05-22 Congress and the Department of Defense DOD are engaged in an extended discourse over the future direction of U S defense strategy and military force structure In the past these discussions have focused almost exclusively on questions related to U S conventional military forces with discussions about nuclear weapons held in separate fora However the 2005 Quadrennial Defense Review QDR examined both nuclear and conventional forces a first in the QDR s history This indicates that analysts both inside and outside government are beginning to review and assess the potential deterrent and operational relationship

between conventional and nuclear weapons It appears that considerable pressure is building on DOD leaders to make strategy and force structure decisions with cost effectiveness in mind A key question for contemporary defense planners is what proportion of U S military capabilities should be focused on traditional military challenges and what proportion should be focused on non traditional challenges such as irregular disruptive and catastrophic threats This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Israel and the Cyber Threat Charles D. Freilich,Matthew S. Cohen,Gabi Siboni,2023-06-23 In Israel and the Cyber Threat Charles D Freilich Matthew S Cohen and Gabi Siboni provide a detailed and comprehensive overview of Israeli s cyber strategy tracing it from its origins to the present They analyze Israel s defensive and offensive capabilities both of which are prodigious to offer insights into what other countries can learn from Israel s experience and actions The most authoritative work to date on Israeli cyber strategy this book provides an in depth look at the major actions Israel has taken in cyberspace and places them in the broader context to help readers understand state behavior in cyberspace

Deterring Russia in Europe Nora Vanaga,Toms Rostoks,2018-09-21 This edited volume examines deterrence and the defense efforts of European states neighboring Russia following the Crimean intervention Deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in Europe Since Russia s annexation of Crimea and the start of the military conflict in Ukraine s Donbass region eastern and northern European states have revised their assessments of Russia s policies and intentions The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security situation in Europe The emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between Russia and the West are among the key differences between the Cold War and the current security environment Structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both NATO and non NATO countries This allows for an in depth analysis of the changing character of deterrence and its practical application by Russia s European neighbours This volume will be of much interest to students of strategic studies European politics Russian foreign
