Deterrence And Persuasion French Nuclear Armament In The Context Of National Policy 1945 1969:

Deterrence and Persuasion Wolf Mendl,1970 A Military History of the Cold War, 1944-1962 Jonathan M.

House,2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House s account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe **U.S.-European**

Nonproliferation Perspectives Camille Grand,2009 Since the fall of the Berlin wall the two sides of the Atlantic have struggled to identify a new common project and create the tools and institutions needed to address common challenges To their credit they have transformed their militaries integrated new members into Western institutions such as the European Union and NATO deepened economic ties developed new partnerships and acquired new capabilities But they have also had a number of ugly and public disputes over the nature and severity of the threats they face as well as the means necessary to combat such threats Now several years after the dark days of 2002 and 2003 the transatlantic partners are working toward renewal Although Iraq remains a stain on their relationship Europe and the United States have come to realize that however vast their differences might be they remain indispensable partners to each other The question before the two partners today particularly in light of the change in administration in Washington is how to capitalize on their comparative strengths to address a long list of common challenges one of the most pressing of which is nuclear proliferation In an effort to shed light

on the issues CSIS commissioned a series of essays on European perspectives on nonproliferation This new report offers a starting point for a new shared understanding of the threat It begins not with a look at the official positions of states with regard to nonproliferation initiatives but instead aims to help experts and interested observers understand some of the underlying historical political and cultural bases on which national views in Europe on nuclear threats are founded These papers help reveal a range of views on nuclear weapons and proliferation and shed light on some of the attitudes that underpin national policies on key issues

Nuclear Reactions Mark S. Bell,2021-04-15 Nuclear Reactions analyzes how nuclear weapons change the calculations states make in their foreign policies why they do so and why nuclear weapons have such different effects on the foreign policies of different countries Mark S Bell argues that nuclear weapons are useful for more than deterrence They are leveraged to pursue a wide range of goals in international politics and the nations that acquire them significantly change their foreign policies as a result Closely examining how these effects vary and what those variations have meant in the United States the United Kingdom and South Africa Bell shows that countries are not generically emboldened they change their foreign policies in different ways based on their priorities This has huge policy implications What would Iran do if it were to acquire nuclear weapons Would Japanese policy toward the United States change if Japan were to obtain nuclear weapons And what does the looming threat of nuclear weapons mean for the future of foreign policy Far from being a relic of the Cold War Bell argues nuclear weapons are as important in international politics today as they ever were Thanks to generous funding from the University of Minnesota and its participation in TOME the ebook editions of this book are available as Open Access volumes available from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories
