David J. Singer

Deterrence Arms Control And Disarmament:

Deterrence, Arms Control, and Disarmament David J. Singer, 1984-01-11 In this volume originally published by Ohio State University Press in 1962 the author discusses the serious strategic gap between those responsible for deterrence and those responsible for disarmament in both the Soviet Union and the United States Even when there is effective communication their policies are often inconsistent erratic and incompatible The purpose of this study is to offer a model of strategic decision making through which we may understand how these irrational policies emerge and how they might be modified

David (Joel David) Singer, 2021-09-09 **Arms Control and Disarmament** Paolo Foradori, Giampiero Giacomello, Alessandro Pascolini, 2017-10-26 This volume is a collection of contributions by world leading experts in the nuclear field who participated in the educational activities of the International School on Disarmament and Research on Conflicts ISODARCO It features some of most prominent scholars and practitioners who contributed in fundamental ways to shaping policies strategies theories scholarly studies and debates in the field of non proliferation and disarmament On the occasion of ISODARCO s 50th anniversary this book revisits a selection of contributions that capture the pressing issues during the five decades of continuous engagement in disarmament and non proliferation education **How to Think about Arms Control, Disarmament, and Defense** Christopher Lamb, 1988 **Deterrence, arms control, and disarmament** Joel David Singer, Arms Control for the Third Nuclear Age David A. Cooper, 2021-10-01 In *Arms Control for the Third Nuclear Age* David A Cooper offers a reappraisal of classic arms control theory that advocates for reprioritizing deterrence over disarmament In this very different era of great power rivalry this hard nosed approach will be a must read for scholars students and practitioners of nuclear arms control **Arms Control** Nancy W. weapons and limited strike capability Originally published in 1982 this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist unilateralist approaches to disarmament and arms control at the time It is not like so many books on the subject an ideological statement there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it The book also includes an essay on attempts to mitigate the appalling brutality of the many conventional wars since 1945 At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues this book was welcome sensible and necessary

Arms Control And International Security Roman Kolkowicz,2019-08-27 Designed to introduce the reader to the critical issues of arms control and international security in the 1980s this collection of provocative and challenging articles encourages a rethinking of conventional wisdom on strategic policy The authors succinctly convey the tensions existing between those who would eliminate the weapons on which strategic deterrence has rested and those who see the Soviet nuclear buildup as a challenge that must be met with increased armaments They reflect as well on the conceptual tension between eliminating nuclear weapons and answering the question of how defense can be managed in the nuclear era Their contributions are at times compelling at times frustrating but at all times informative and of critical importance

The Future of Extended Deterrence Stéfanie von Hlatky,Andreas Wenger,2015-09-01 Are NATO s mutual security commitments strong enough today to deter all adversaries Is the nuclear umbrella as credible as it was during the Cold War Backed by the full range of US and allied military capabilities NATO s mutual defense treaty has been enormously successful but today s commitments are strained by military budget cuts and antinuclear sentiment The United States has also shifted its focus away from European security during the wars in Afghanistan and Iraq and more recently with the Asia rebalance Will a resurgent Russia change this The Future of Extended Deterrence brings together experts and scholars from the policy and academic worlds to provide a theoretically rich and detailed analysis of post Cold War nuclear weapons policy nuclear deterrence alliance commitments nonproliferation and missile defense in NATO but with implications far beyond The contributors analyze not only American policy and ideas but also the ways NATO members interpret their own continued political and strategic role in the alliance In depth and multifaceted The Future of Extended Deterrence is an essential resource for policy practitioners and scholars of nuclear deterrence arms control missile defense and the NATO alliance

The Consequences of American Nuclear

Disarmament Christine M. Leah,2017-02-18 This book is about the future of nuclear weapons geopolitics and strategy It

examines the legacy of nuclear weapons on US thinking about some concepts of strategy and geopolitics namely deterrence extended deterrence alliances and arms control The purpose of this is to demonstrate just how fundamentally nuclear weapons have influenced American thinking about these concepts It argues that given the extent of nuclear weapons influence on these concepts and the implications for international security further reductions beyond current Strategic Arms Reduction Talks START levels and the more absolute idea of nuclear disarmament may not necessarily be prudent ideas Nuclear weapons have contributed to the avoidance of major war between states made alliances more credible and last longer and have made arms control relatively easier to conceptualize and manage As such the author argues these concepts may become even more difficult to manage in a world where nuclear weapons are marginalized Arms Control United States. Arms Control and Disarmament Agency,1978 Bulletin of the Atomic Scientists ,1963-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Deterrence and Nuclear Proliferation in the Twenty-First Century Stephen J. Cimbala,2000-12-30 This edited collection considers the future of nuclear weapons in world politics in terms of security issues that are important for U S and other policy makers The spread of nuclear weapons also is related to the equally dangerous proliferation of other weapons of mass destruction including chemical and biological weapons and of ballistic missiles of medium and longer ranges Cold War studies of nuclear weapons emphasized the U S Soviet relationship deterrence and bilateral arms control A less structured post Cold War world will require more nuanced appreciation of the diversity of roles that nuclear weapons might play in the hands of new nuclear states or non state actors As the essays suggest as well the possibility of terrorism by means of nuclear or other weapons of mass destruction introduces other uncertainties into military and policy planning An important analysis for scholars students and researchers involved with defense security and foreign policy studies **Strategy and Arms Control** Thomas C. Schelling,Morton H. Halperin,1961 *Nonproliferation, Arms Control and Disarmament and Extended Deterrence in the New Security Environment* ,2009 With the end of the Cold War in a dramatically changed security environment the advances in nonnuclear strategic capabilities along with reduced numbers and roles for nuclear forces has altered the calculus of deterrence and defense at least for the United States For many this opened up a realistic possibility of a nuclear free world It soon became clear that the initial post Cold War hopes were exaggerated The world did change fundamentally but it did not become more secure and stable In place of the old Soviet threat there has been growing concern about proliferation and terrorism involving nuclear and other weapons of mass destruction WMD regional conflicts global instability and increasingly serious new and emerging threats including cyber attacks and attacks on satellites For the United States at least in this emerging environment the political rationales for nuclear weapons from deterrence to reassurance to alliance management are changing and less central than during the Cold War to the security of the United States its friends and allies Nuclear

weapons remain important for the US but for a far more limited set of roles and missions As the Perry Schlesinger Commission report reveals there is a domestic US consensus on nuclear policy and posture at the highest level and for the near term including the continued role of nuclear arms in deterring WMD use and in reassuring allies Although the value of nuclear weapons has declined for the United States the value of these weapons for Russia China and so called rogue states is seen to be rising The nuclear logic of NATO during Cold War the need for nuclear weapons to counter vastly superior conventional capabilities of the Soviet Union and the Warsaw Pact is today heard from Russians and even some proliferants Moreover these weapons present a way for rogues to achieve regional hegemony and possibly to deter interventions by the United States or others While the vision of a nuclear free world is powerful both existing nuclear powers and proliferators are unlikely to forego nuclear weapons entirely in a world that is dangerous and uncertain And the emerging world would not necessarily be more secure and stable without nuclear weapons Even if nuclear weapons were given up by the United States and other nuclear weapon states there would continue to be concerns about the proliferation of nuclear chemical and biological weapons which would not disappear and could worsen WMD terrorism would remain a concern that was largely unaffected by US and other nuclear weapon decisions Conventional capabilities would not disappear and the prospects for warfare could rise In addition new problems could arise if rogue states or other non status quo powers attempted to take advantage of moves toward disarmament while friends and allies who are not reassured as in the past could reconsider their options if deterrence declined To address these challenges non and counter proliferation and counterterrorism including defenses and consequence management are priorities especially in light of an anticipated renaissance in civil nuclear power The current agenda of the United States and others includes efforts to 1 Strengthen International Atomic Energy Agency IAEA and its safeguards system 2 Strengthen export controls especially for sensitive technologies by limiting the development of reprocessing and enrichment technologies and by requiring the Additional Protocol as a condition of supply 3 Establish a reliable supply regime including the possibility of multilateral or multinational ownership of fuel cycle facilities as a means to promote nuclear energy without increasing the risks of proliferation or terrorism 4 Implement effectively UN Security Council Resolution 1540 and 5 Strengthen and institutionalize the Proliferation Security Initiative and the Global Initiative to Combat Nuclear Terrorism These and other activities are important in themselves and are essential to maintaining and strengthening the Nonproliferation Treaty NPT bargain by bolstering two of its pillars nonproliferation and peaceful nuclear energy cooperation There is no alternative and little prospect for a better deal
