The Fairytale as Art Form and Portrait of Man Max Luthi, 1987-02-22 Fairytales have amused and delighted generations of both children and adults They possess the unique quality of bringing together the human and otherworldly creating a special kind of magic In this major work by the distinguished Swiss folklorist Max L thi the traditional fairytale is examined from two points of view that of aesthetics and that of anthropology According to the author fairytales have been told time and again because they provide pleasure Therefore an aesthetics of the fairytale must be concerned with why these stories are still a source of pleasure L thi shows that fairytales are more than just pleasing form they present a particularly way of looking at the world and at human existence Thus they must be evaluated in terms of what they say about man and the human condition From publisher s description *Monatsschrift Für Das Deutsche Geistesleben* ,1926 **Catalogue of the Library of the Peabody Institute of the City of Baltimore ...** Johns Hopkins University.
