## **Developing And Using Tests Effectively A Guide For Faculty:**

**Developing and Using Tests Effectively** Lucy Chesser Jacobs, Clinton I. Chase, 1992-11-05 It is estimated that up to 20 percent of a professor's time is spent evaluating the impact of instruction. Yet most faculty receive little formal training in classroom testing or other means of determining which students have attained course objectives and which have not. *Developing and Using Tests Effectively* offers practical guidelines that faculty members can use to improve their skills in the development, administration and grading of classroom tests. This book offers specific advice on every stage of the testing process including planning the test and classifying objectives to be measured, ensuring the validity and reliability of the test and grading to arrive at fair grades based on relevant data. Lucy Jacobs and Clinton Chase examine the strengths and weaknesses of many types of tests including both traditional multiple choice, true/false, matching, completion and essays and alternative take-home, open book and oral assessment procedures. For every testing procedure they show how faculty members can write tests that are fairer and more valid and that do a better job of measuring what students learn, thereby improving faculty members' ability to assess learning outcomes. The authors reveal, for example, how essay tests may often measure only the skill of the grader in assessing what the writer has said and offer suggestions for improving the instructor's skill in reading essays and scoring them reliably. They discuss the problem of cheating and suggest ways to deal with it. They examine the advantages and limitations of using computers for classroom testing. And they describe such alternative assessment procedures as portfolios, journals and peer testing. Resources in Education, 1997 The SAGE Handbook of Management Learning, Education and Development Steven J. Armstrong, Cynthia V. Fukami, 2009-05-07 The scholarship of management teaching and learning has established itself as a field in its own right and this benchmark handbook is the first to provide an account of the discipline. Original chapters from leading international academics identify the key issues and map out where the discipline is going. Each chapter provides a comprehensive and critical overview of the given topic area, highlights current debates and reviews the emerging research agenda. Chapters embrace the study of organizations as a whole, the concepts of individual and collective learning, the delivery of formal management education and the facilitation of management development. Through consideration of these themes, the Handbook analyzes, promotes and critiques the contribution of management learning, education and development to management understanding. It will be an invaluable point of reference for all students and researchers interested in broadening their understanding of this exciting and dynamic new field. **Handbook on Teaching Undergraduate Science Courses** Gordon Uno, 1999 This already popular teaching resource is an informative, insightful guide to science teaching. Effective Grading Barbara E. Walvoord,Virginia Johnson Anderson,1998-02-25 The grading process can yield rich information about student learning Effective Grading enables faculty to go beyond using grades as isolated artifacts and helps them make classroom grading processes more fair time efficient and conducive to learning Classroom assessment of student learning can then contribute to departmental and general education assessment in ways that meet the needs of institutions and accrediting agencies Tailored to specific needs of faculty members who seek to make grading a valuable part of student learning and motivation Effective Grading balances assessment theory and hands on advice It offers an in depth examination of the link between teaching and grading and provides concrete guidance on such critical steps as setting and communicating grading standards developing assignments to grade managing time spent on grading and providing feedback for students
