Developing Critical Thinkers Challenging Adults To Explore Alternative Ways Of Thinking And Acting:

Developing Critical Thinkers Stephen D. Brookfield, 1987 Introducing critical thinking this book looks at general ways in which people can be helped to become critical thinkers and also reviews opportunities for developing critical thinking in specific contexts

Developing Critical Thinkers Stephen Brookfield, 1987-09-11 Learning to think critically is one of the most significant activities of adult life When we become critical thinkers we become aware of the assumptions under which we and others think and act However critical thinking has been greatly neglected in the adult educational literature This book aims to introduce readers to critical thinking A central theme is the need for people to make connections between their private lives and broader social forces Back cover

Developing Faculty Learning Communities at Two-Year Colleges Susan Sipple, Robin Lightner, 2023-07-03 This book introduces community college faculty and faculty developers to the use of faculty learning communities FLCs as a means for faculty themselves to investigate and surmount student learning problems they encounter in their classrooms and as an effective and low cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes Two year college instructors face the unique challenge of teaching a mix of learners from the developmental to high achievers that requires using a variety of instructional strategies and techniques Even the most experienced teachers can find this diversity demanding Faculty developers at many two year colleges still rely solely on the one day workshop model that while useful rarely results in sustained student centered changes in pedagogy or the curriculum and may not be practicable for the growing cohort of part time faculty members By linking work in the classroom with scholarship and reflection FLCs provide

participants with a sense of renewed engagement and stimulate collegial exploration of ways to achieve educational excellence FLCs are usually faculty instigated and cross disciplinary and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences foster community and develop the scholarship of teaching FLCs alleviate burnout and isolation promote the development testing and peer review of new classroom strategies or technologies and lead to the reenergizing and professionalization of teachers This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning offering examples of application in two year colleges Individual chapters describe among others an FLC set up to support course redesign an Adjunct Connectivity FLC to integrate part time faculty within a department and collaborate on the curriculum a cross disciplinary FLC to promote student self regulated learning and improve academic performance and persistence a critical thinking FLC that sought to define critical thinking in separate disciplines examine interdisciplinary cross over of critical thinking and measure critical thinking more accurately an FLC that researched the transfer of learning and developed strategies to promote students application of their learning across courses and beyond the classroom Each chapter describes the formation of its FLC the processes it engaged in what worked and did not and the outcomes achieved Just as when college faculty fail to remain current in their fields the failure to engage in continuing development of teaching skills will equally lead teaching and learning to suffer When two year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student success When FLCs are supported by leaders and administrators and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional they become intrinsically motivated and committed to collaboratively solving problems setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change

A Guide to Learning

Independently Lorraine Marshall, Frances Rowland, 2013-09-16 A Guide to Learning Independently 5e describes techniques to help students succeed in formal education It helps with learning tasks such as writing assignments reading textbooks making notes and concentrating when studying as well as offering a range of suggestions as to how students can meet the requirements of their teachers and courses It is also designed to help students discover their own learning goals and how they learn best The text rests on the premise that it is possible for a person to change the way they approach their learning It is directed to the individual student because it is the individual who must write the essays and reports pass the exams and organise themselves in order to be successful in the tertiary education system As well as offering realistic and well tested study strategies this Guide focuses on your reasons for study as you balance the demands of study with the rest of your life It will help you clarify your particular strengths as a learner and develop a repertoire of independent lifelong learning skills The comprehensive range of study techniques

Becoming a Critically Reflective Teacher Stephen Brookfield, 1995-10-13 Building on the insights of his highly acclaimed earlier work *The Skillful Teacher* Stephen D Brookfield offers a very personal and accessible guide to how faculty at any level and across all disciplines can improve their teaching Applying the principles of adult learning Brookfield thoughtfully guides teachers through the processes of becoming critically reflective about teaching confronting the contradictions involved in creating democratic classrooms and using critical reflection as a tool for ongoing personal and professional development Using numerous examples Brookfield describes what critical reflection is and why it is so important He tells how teachers can reframe their teaching by viewing their practice through four distinctive lenses their autobiographies as teachers and learners their students eyes their colleagues perceptions and theoretical literature He includes specific advice on using practical approaches to critical reflection such as teaching diaries role model profiles participant learning portfolios structured critical conversation the Critical Incident Classroom Questionnaire the Good Practices Audit and more He explains how the literature of educational research and philosophy can be used as an aid to rather than an inhibitor of critical reflection And he discusses how to create a campus culture that supports critically reflective teaching

Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there's a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e.g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum

into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professionalrporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments **Academy of Management Learning and Education**

,2009 **The Profession and Practice of Adult Education** Sharan B. Merriam,Ralph Grover Brockett,1997 This book fills the gap for a comprehensive authoritative introduction to the field of adult and continuing education Two of the most respected authors in the field Sharan B Merriam and Ralph G Brockett provide an insightful analysis of this rapidly developing field and a thorough grounding in its guiding concepts purposes and practices of programs Comprehensive in scope The Profession and Practice of Adult Education offers a philosophical overview of adult education clearly defines the field and its development reviews goals and purposes outlines the delivery of programs by agencies and organizations examines major concepts and trAnds and presents a vision for the future Merriam and Brockett examine the role professional associations literature and information resources and the academic preparation of adult educators play in the ongoing professionalization of the field They explore such critical questions as What are the objectives to achieving unity in a field as diverse as adult education and Are there advantages for adult education aligning itself more closely with education Should the primary focus be on the individual or society The authors take a broader global perspective on the troublesome issue of opportunity access and participation The authors explore the area of adult education outside the mainstream of practice by examining who nontraditional educators are and what they do They place special emphasis on social change as an objective of adult education The book also touches on adult education as a forum for the international exchange of ideas and experiences and reveals what the field is like in other parts of the world In the concluding chapter Merriam and Brockett offer a vision of the future of adult education for the next millennium **Discussion as a Way of Teaching** Stephen Brookfield,Stephen Preskill,1999 Written for all university and college teachers interested in experimenting with discussion methods in their classrooms includes usable suggestions on How to prepare students and teachers to participate in discussion How to get discussions started How to keep discussions going How to ensure that teachers and students voices are kept in some sort of balance Back cover **Learning as a Way of Leading** Stephen D. Brookfield,Stephen Preskill,2009 This book offers a systematic look at the connections between learning and leading and the use of learning to

inspire and organize for change It explores two interrelated dimensions of learning leadership the ways leaders themselves learn about leadership practice and the way leaders foster the learning of those they work with The book focuses on a number of important leadership activities and adopts a case study approach to illuminate how leaders themselves learn how they impart knowledge to others and how they support others in becoming more effective and enduring learners

Academic Freedom and the Adult Student in Catholic Higher Education John Anthony Vigilanti, 1992 Covering the subject of academic freedom this book examines this area with regard to adult students who follow a Catholic education

Self-Direction for Lifelong Learning Philip C. Candy, 1991-04-16 The purpose of the book is to present a comprehensive survey and analysis of the concept of self direction in learning to trace its ideological roots to examine its history to explore its manifestations in various fields of education and to provide some specific insights into strategies that may be used to induce or develop self direction in learners Basically then the book is about the development and exercise of self directedness in learning especially in adulthood It celebrates individuality but at the same time recognises the essentially social nature of learning and of human existence It attempts to reconcile and integrate ideas and practices some very familiar and some quite novel derived from many parts of the world many domains and contexts of learning and many historical periods It is a tapestry woven from threads provided largely by others
