And hence, Ageing finance has been developed into an independent area for research and practice. It helps the country adapt to new elderly support systems, which is the necessary result from China's admirable economic development and changes in population structure. Ageing finance is the sum of financial activities centered on various social needs of providing for the aged and serving for their society. It includes pension finance, old age wealth management service and finance of ageing industry. Chinese government and people are facing a very unique situation as our population structure is deeply changed by the One Child Policy since the last 70s. The slope of ageing curve is sharper than most countries, yet it has achieved the most successful economic development in the world during the same period. Design for the Changing Educational Landscape Andrew Harrison,Les Hutton,2013-10-15 The whole landscape of space use is undergoing a radical transformation In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide the rise of distributed space In the learning environment the social political economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching and a wide acceptance of the importance of learning as the core of the community resulting in the blending of all aspects of learning into one seamless experience This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces real and virtual that now accommodate the experience of learning and provide pointers towards the creation and design of learning centred communities Part 1 looks at the entire learning universe as it now stands tracks the way in which its constituent parts came to occupy their role assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform It shows that what is required is innovation within the spaces and integration between them Part 2 finds many examples of innovation in evidence across the world in schools the higher and further education campus and in business and cultural spaces but an almost total absence of integration Part 3 offers a model that redefines the learning landscape in terms of learning outcomes mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale By encouraging stakeholders to creating an events based rather than space based identity the book hopes to point the way to a fully integrated learning landscape a learning community **Developing Retirement**
