Developing The Icbm A Study In Bureaucratic Politics:

Developing the ICBM Edmund Beard,1976 **The Cold War: National security policy planning from Truman to Reagan and from Stalin to Gorbachev** Lori Lyn Bogle,2001 This volume is a comprehensive collection of critical essays on The Taming of the Shrew and includes extensive discussions of the play s various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality The State, Society, and Limited Nuclear War Eric Mlyn,1995-02-01 Drawing on theories of the state archives and interviews with top defense policymakers this book tells an important story of interest to any reader concerned with how security policy is fashioned in the United States **The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991** J. D. Hunley,2013-03-15 In this definitive study J D Hunley traces the program s development from Goddard s early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight Militarizing Outer Space Alexander C.T. Geppert,Daniel Brandau,Tilman Siebeneichner,2020-12-02 Militarizing Outer Space explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry Concentrating on weapons warfare and violence this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens The third and final volume in the groundbreaking European Astroculture trilogy Militarizing Outer Space zooms in on the interplay between security technopolitics and knowledge from the 1920s through the 1980s Often hailed as the site of heavenly utopias and otherworldly salvation outer space transformed from a promised sanctuary to a present threat where the battles of the future were to be waged Astroculture proved instrumental in fathoming forms and functions of warfare s futures past both on earth and in space The allure of dominating outer space the book shows was neither limited to the early twenty first century nor to current American space force rhetorics The Presidency of Dwight D. Eisenhower Chester J. Pach,Elmo Richardson,1991 The best single volume available on the Eisenhower presidency Stephen E Ambrose author of Eisenhower The Annals of the American Academy of Political and Social Science ,1978-03 *The International*

Environment for Territorial Politics in the United Kingdom Peter Byrd,1980 **The Library Journal Book Review** ,1977

Security and Arms Control: A guide to national policymaking Edward A. Kolodziej,Patrick M. Morgan,1989 This book the first in a two volume set is organized around the idea that national and international security and arms control studies are interdisciplinary fields of study Together the volumes give form and substance to these emerging fields This first volume is concerned with broad analytical perspectives that are relevant to the security and arms control considerations of any national government subfield to assist more in depth analysis by researchers and Volume 1 is divided into four parts The first identifies those characteristics of the international system that condition the use of or the threat to use force It also explores those aspects of the system that prompt the need for ways to control violence and to discipline it to the national purpose Twelve functions of national strategic policy are covered in parts two and three A final section reviews ways that might be used to go beyond violence or threats in coping with human conflict Through the topics selected for inclusion the guide attempts to define the scope of security and arms control studies as a serious field of systematic inquiry It identifies major problems key concepts methods disciplinary approaches intellectual styles and data sources associated with the principal subfields of the discipline It critically reviews and evaluates the most important literature associated with each subfield to assist more in depth analysis by researchers and policymakers **Profiles of an Era, the Nixon/Ford Years** Eleanor W. Schoenebaum,1979 *Guia bibliogràfica sobre estratègia i proliferació nuclears* Vicenç Fisas Armengol,1983

The Nuclear Predicament Peter R. Beckman,1999 Ideal for use in all Nuclear Issues American Foreign Policy International Relations Global Issues and Contemporary History courses at the undergraduate level Thoroughly revised to reflect the changes that the end of the cold war has brought to nuclear issues and to examine our new nuclear future this interdisciplinary text shows how nuclear weapons have changed the world militarily politically socially and ethically Seeking to shake readers out of their nuclear complacency it fully examines the evolving nuclear predicament that nuclear weapons can be massively destructive yet we are moving into a period when nuclear weapons are more likely to be used and considers particular strategies to cope with and shape the nuclear future **The Journal of Military History** ,1991 Includes scholarly articles and book reviews on topics in military history *Universal Reference System* Springer,Springer London, Limited,1980-10-01 *California Management Review* ,2010 **Science, Technology and the Military** Everett Mendelsohn,Merritt Roe Smith,P. Weingart,1988 The extensive interaction between science technology and the military has become increasingly apparent in the years since the Second World War New institutional arrangements new fields of study and research new patterns of funding and support new relations with industry the academy and the state and new professional roles have marked the sciences and technology the military transformations have been equally important new weapons systems of great complexity new strategies and practices new reliance on high technologies and advanced sciences and extensive involvement in the funding of science and technology in the civilian sector While the literature in the social

studies of science and technology has from time to time addressed these issues especially from the historical perspective the attention paid to the very extensive interactions and concomitant transformations has not been commensurate with the magnitude of the enterprise or changes undergone These volumes contribute both reports of new research and stimulating additional study Volume 12 1 contains Part I War and the restructuring of physics and Part II The military and technological development Volume 12 2 contains Part III Transformation of industry and medicine Part IV Nuclear weapons and nuclear power and Part V R D military industry and the academy Business and Economic History Business History Conference,1993 *Congressional Defense Policy-making and the Arms Control Community* Howard Stoffer,1982 **Weapons Technology, Disarmament, and Verification** ,1991
