Mobilizing Minds: Creating Wealth From Talent in the 21st Century Organization Lowell L. Bryan, Claudia L. Joyce, 2007-06-17 Based on a decade of exclusive research Lowell Bryan and Claudia Joyce of McKinsey Company have come up with a simple yet revolutionary conclusion Your workforce is the key to growth in the 21st century By tapping into their underutilized talents knowledge and skills you can earn tens of thousands of additional dollars per employee and manage the interdepartmental complexities and barriers that prevent real achievements and profits This can only be accomplished through organizational design and redesign That s the new model for survival in the modern digital global economy With the right design your organization will have the capabilities to pursue whatever strategy is necessary to compete on any scale react to any market change leverage any opportunity and sail past the competition In *Mobilizing Minds* the authors distill their research into seven strategic ideas that shatter the complexity frontiers have the potential to unleash enormous profits and enable long term success for every company Bryan and Joyce outline innovative principles that enable corporations to Manage complexity bureaucracy and redundancy Use hierarchical authority to strengthen the authority of key managers and drive performance Deliver operating earnings while implementing wealth creation strategies Allow formal networks talent and knowledge marketplaces to work in a large company Motivate and reward wealth creating behavior Pursue organizational design as a corporate strategy Increase worker satisfaction It is imperative for corporations to put the same energy used for new products and processes into organizational design That s where the money is That s where the opportunities lie That s the key to surviving and prospering in the 21st century

Adaptive Origins Peter LaFrenière, 2011-01-07 In this text students are invited to rethink psychology by grounding it in the natural sciences with the understanding that evolutionary and developmental processes work together with culture to solve problems of human adaptation These processes are cast as interdependent Development cannot be understood except in the light of evolutionary theory and the best proof of evolution is the fact of development For students of evolutionary psychology all the central topics such as evolved mental modules for theory of mind or language require an understanding of the developmental processes that lead to their expression Genes as important as they are are never the whole story The role of biological factors is explored in chapters outlining evolution development genetics human origins hormones and the brain Then the integrative value of this evolutionary developmental vision in understanding key topics in psychology is illustrated by applying it to traditional area of inquiry including infancy and attachment emotions and their expression social relations with peers cognitive and language development sex differences courtship and mating
