Developing And Implementing Critical Paths In Rehabilitation:

Contemporary Issues in Coronary Care Nursing Fiona Timmins, 2005-08-15 In this text Fiona Timmins integrates the findings of recent nursing research with key aspects of the nurse's role. She provides an evidence-based rationale for the best ways of improving cardiac care in general and for specific conditions, describes important nursing initiatives to reduce the risk factors and presents a needs-based approach to patient education. Concerned with the need to bridge the current research-practice gap in coronary care, she knows how nurses can make the best use of available research and describes the advances that are being made in nurse-led services in this area. *Contemporary Issues in Coronary Care Nursing* offers a non-medical approach to coronary care and is informed throughout by the latest nursing theory and research. *Development of an Instrument to Assess Critical Pathway Implementation in Health Care Organizations* Todd Ray, 1993 *Cumulated Index Medicus*, 1997 *Developing and Implementing Critical Paths in Rehabilitation* Michael T.
