Teaching for Dissent Sarah Marie Stitzlein, 2015-11-17 Teaching for Dissent looks at the implications of new forms of dissent for educational practice The reappearance of dissent in political meetings and street protests opens new possibilities for improved democratic life and citizen participation This book argues that this possibility will not be fulfilled if schools do not cultivate the skills necessary for our citizens to engage in political dissent The authors look at how practices in schools such as the testing regime and the hidden curriculum suppress students ability to voice ideas that stand in opposition to the status quo Teaching for Dissent calls for a realignment of the curriculum and the practices of schooling with a guiding vision of democratic participation [Reclaiming Dissent](#) ,2009-01-01

Reclaiming Dissent is a unique collection of essays that focus on the value of dissent for the survival of democracy in the United States and the role that education can play with respect to this virtue The various contributors to this volume share the conviction that the vitality of a democracy depends on the ability of ordinary citizens to debate and oppose the decisions of their government Yet recent history in the United States suggests that dissent is discouraged and even suppressed in the political cultural and educational arenas Many Americans are not even aware that democracy is not primarily about voting every four years or majority rule but about actively participating in public debates and civic action This book makes a strong case for the need to reclaim a tradition in the United States like the one that existed during the Civil Rights Era in which dissent opposition and conflict were part of the daily fabric of our democracy Teacher educators teacher candidates new

Teaching Virtue and Practical Reason Amy D. Gossett,2004 This dissertation constructs an Aristotelian model of civic education and explores the degree to which all schools may employ these principles Much of today s educational debate centers on the inadequacy of public schools for providing the tools necessary for individual achievement or societal cohesion Recent violence on school campuses has only exacerbated these perceptions My project seeks to improve so called values education dialogue by avoiding the political left s problem of relativism and the political right s imposition of religious dogma I utilize Aristotle s Politics Nicomachean Ethics and Eudemian Ethics to develop a framework for civic education that stresses the teaching of virtuous behaviors and practical reason This model is then used to stimulate critical self reflection of our schooling processes and highlight possible areas of success and failure The model becomes the lens through which I interpret what some classes are doing to civically engage students I observed many learning episodes in a variety of classroom settings secular and non secular public and private and both untracked and Advanced Placement courses The Aristotelian model helps create an explicit self awareness of civic teaching methods that otherwise may be overlooked or under utilized in classrooms By illuminating and emphasizing these strategies they may be more consciously and consistently applied throughout the curriculum By using a new framework I seek to move research beyond simply recording the deficiencies of public schools toward reproducing the strengths of all schools
