Harvard Monographs in Education, 1923 Developing Education Philip Hunter, 1998 Books like this are usually boring This one isn't The book rehearses issues already in the public domain but as a compact thought provoking and therefore horizon stretching set of real information and suggested deductions this short readable enjoyable volume has a very great deal to recommend it School Leadership and Management In this book influential educationalists have tried to predict the shape of education 15 years ahead They have looked at standards of achievement the curriculum the teaching force financing governance international dimensions employer needs and the impact of technology Developing Education provides a context for politicians administrators *Education Policy in Developing Countries* Paul Glewwe, 2024-05-31 Almost any economist will agree that education plays a key role in determining a country's economic growth and standard of living but what we know about education policy in developing countries is remarkably incomplete and scattered over decades and across publications Education Policy in Developing Countries rights this wrong taking stock of twenty years of research to assess what we actually know and what we still need to learn about effective education policy in the places that need it the most Surveying many aspects of education from administrative structures to the availability of health care to parent and student incentives the contributors synthesize an impressive diversity of data paying special attention to the gross imbalances in educational achievement that still exist between developed and developing countries They draw out clear implications for governmental policy at a variety of levels conscious of economic realities such as budget constraints and point to crucial areas where future research is needed Offering a wealth of insights into one of the best investments a nation can make Education Policy in Developing Countries is an essential contribution to this most urgent field Development Centre Studies Education, Migration and Productivity An Analytic Approach and Evidence from Rural Mexico Taylor J. Edward, Yúnes-Nau de Antonio, 1999-04-26 This book challenges the assumption that the major benefits of investment in rural education accrue to traditional agricultural activities such as staples production *German Views of American Education, with Particular Reference to Industrial Development* Edward Charles Elliott, William Nicholas Hailmann, 1907 *The Teacher's Encyclopaedia of the Theory, Method, Practice, History and Development of Education at Home and Abroad* Arthur Pillans Laurie, 1911 Development, Education and Learning in Sri Lanka Angela W. Little, 2024-06-13 Sri Lanka's early

achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island wide in myriad communities, schools, classrooms and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians and members of local, national and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere through an understanding of national political, economic and social conditions, crises and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values and means of development.

Praise for Development Education and Learning in Sri Lanka: Through rigorous and comprehensive research and a blend of local and global perspectives, this book offers invaluable insights for academics and policymakers alike. Tara de Mel, Director, Bandaranaike Academy for Leadership and Public Policy and former Secretary, Sri Lanka Ministry of Education. Reflecting on a career long engagement with education and development, Angela Little brilliantly co-locates the personal, political and the theoretical. A privilege to read. Simon McGrath, University of Glasgow. This passionate engagement with education reform and development offers very instructive lessons for academics and policymakers in Sri Lanka and beyond. Siri T. Hettige, University of Colombo. Fifty years of personal experience in Sri Lanka from many vantage points. A focus on education and society rather than education alone. And a concern to understand rather than prescribe. This book has no competitors. Mick Moore, Institute of Development Studies, Sussex.

Rural Education in China: Policy and Development (1978 - 2018) Wu Zhihui, 2025-09-23. This book reveals the policy changes and profound transformations in rural education in China over the past 40 years of reform and opening up. The book emphasizes the need to accurately address the relationship between urban and rural educational development, adopt an integrated urban-rural education mindset and establish a mechanism for promoting balanced development by linking urban and rural areas, advancing overall progress and ensuring urban-rural integration. This will comprehensively revitalize rural education. We must treat the development of rural education as the most foundational livelihood project and regard promoting fairness and justice in urban-rural education as a long-term task focusing on balance, strengthening the foundation and addressing shortcomings. We must adhere to the rule of law in education, enhance and improve the leadership of the party and government over rural education and correctly guide public

opinion and manage societal mindset We must strengthen research on rural education make top level designs for the future development of rural education and inspire innovative vitality among grassroots educators effectively conducting rural education modernization experiments to lay a solid foundation for achieving the fundamental modernization of socialism with Chinese characteristics
