Developing Frontier Cities Harvey Lithwick, Yehuda Gradus, 2013-04-17 The Unique Nature of Frontier Cities and their Development Challenge Harvey Lithwick and Yehuda Gradus The advent of government downsizing and globalization has led to enormous competitive pressures as well as the opening of new opportunities How cities in remote frontier areas might cope with what for them might appear to be a devastating challenge is the subject of this book Our concern is with frontier cities in particular In our earlier study *Frontiers in Regional Development* Rowman and Littlefield 1996 we examined the distinction between frontiers and peripheries The terms are often used interchangeably but we believe that in fact both in scholarly works and in popular usage very different connotations are conveyed by these concepts Frontiers evoke a strong positive image of sparsely settled territories offering challenges adventure unspoiled natural landscapes and a different and for many an attractive life style Frontiers are lands of opportunity Peripheries conjure up negative images of inaccessibility inadequate services and political and economic marginality They are places to escape from rather than frontiers which is where people escape to Peripheries are places of and for losers

International Handbook on Geographical Education

Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

The Geography of South America Thomas A. Rumney, 2013-04-18 South America is an area of fascination and study for geographers and other scholars from around the world and its land and people have played important roles in the discovery and distribution of civilizations resources and nations for millennia The region has long stimulated a large amount of research across the many subdisciplines of geography and Thomas A Rumney collects organizes and presents as many scholarly publications as possible in *The Geography of South America A Scholarly Guide and Bibliography* Every South American nation is included Argentina Bolivia Brazil Chile Colombia Ecuador French Guiana Guyana Paraguay Peru Surinam Uruguay and Venezuela Beginning with an overview of the region as a whole

successive chapters one per nation are divided by specific subdisciplines of geography cultural social economic historical physical and environmental political and urban Each section is then divided by document type atlases books book chapters articles from scholarly journals master s theses and doctoral dissertations Although the majority of entries focus on English language works selected entries written in Spanish French German and other languages are also included with the entry titles translated into English and noted accordingly **Enterprising Worlds** Jay D. Gatrell,Neil Reid,2007-05-16

Enterprising World represents the culmination of several years of work by geographers planners and economists The chapters represent the collective efforts of the International Geographical Union s Commission on the Dynamics of Economic Spaces This collection is the result of the 2005 annual meeting in Toledo Ohio USA The chapters have been selected based on their contribution to the broader community of economic geographers and policymakers and to demonstrate the inherent interconnectedness of these themes and at times the conceptual tension that exists between ethics economics and the environment insofar as these important issues shape the contours and cleavages of contemporary regional development In particular the chapters represent the diversity of perspectives on these issues The authors provide insight into the workings of a variety of communities regions and nations as they seek to balance economic growth with the growing necessity to simultaneously promote ethical and sustainable regional development As such this book is truly international in both scale and scope and provides the reader with a survey of emerging and established concepts theories and conflicts in economic geography Emerging Nodes in the Global Economy: Frankfurt and Tel Aviv Compared D. Felsenstein,E.W. Schamp,A.

Shachar,2013-03-14 Cities form one of the principal arenas in which globalization processes are manifest Much of the interest in the urban outcomes of globalization is focused on a limited number of iconic global or world cities Most places however will never attain that status They are more likely to play limited and specialized roles in a world economy increasingly dominated by flows Emerging Nodes in a Global Network looks at the temporal and volatile ways in which two such cities Frankfurt and Tel Aviv engage the global economy The central thesis of the book contends that the current round of globalization is characterized by places selectively functioning as nodes within global networks Drawing on a combination of qualitative and quantitative empirical studies of leading sectors in Frankfurt and Tel Aviv financial and business services high technology air transportation tourism and cultural industries the process of network formation is systematically analyzed and the role of national and regional policy is highlighted Audience This book will be of major interest to academics researchers practitioners and policy makers in the areas of urban and economic geography public policy and economic development It also provides valuable material for government officials and regional and national agencies involved in metropolitan planning and development **Geographical Education in a Changing World** John Lidstone,Michael

Williams,2006-07-19 This book results from the work of the Commission on Geographical Education of the International Geographical Union Part 1 focuses on the distinctive traditions of school geography Part 2 reviews the state of school

geography on a broad continental basis including national case studies by local experts The final chapters extrapolate from the present and point to likely future developments in the subject again with examples drawn from various countries

Urban Planning During Socialism Jasna Mariotti, Kadri Leetmaa, 2023-10-30 Urban Planning During Socialism delves into the evolution of cities during the period of state socialism of the 20th century summarizing the urban and architectural studies that trace their transformations The book focuses primarily on the periphery of the socialist world both spatially and in terms of scholarly thinking The case study cities presented in this book draw on cultural and material studies to demonstrate diverse and novel concepts of periphery through transformations of socialist cityscapes rather than homogenous views on cities during the period of state socialism of the 20th century In doing so the book explores the transversalities of political economic and social phenomena the places for everyday life in socialist cities the role of professional communities on production and reproduction of space and ecological thinking This book is aimed at scholarly readership in particular scholars in architecture urban planning and human geography as well as undergraduate graduate and post graduate students in these disciplines studying the urban transformation of cities after World War II in socialist countries It will also be of interest for planning officials architects policymakers and activists in former socialist countries *Canadian*
