

Developing Number Sense

through Real-Life Situations in School

Number sense is “a way of thinking that should permeate all aspects of mathematics teaching and learning” (Reys 1994, p. 114). NCTM (1989, 2000) states that the development of number sense should be connected with real-life situations. If children learn to apply numbers within

real contexts, numbers will have significant meaning for them. Furthermore, *Curriculum and Evaluation Standards for School Mathematics* (NCTM 1989) stresses that “children with good number sense develop references for measuring common objects and situations in their environments” (p. 38). This statement reinforces the idea that children’s number sense can be developed through interaction with everyday objects in a realistic setting. This article shares a fourth-grade lesson from Taiwan in which number sense is developed through real classroom interactions.

with contributions from the world's leading scholars and most active researchers. The book presents the latest original research work with a particular focus on the teaching side of Chinese mathematics education to a wide international audience. There are mainly three sections in the book. The first section introduces readers to a historical and contemporary perspective respectively on traditional mathematical teaching in ancient China and on how modern Chinese mathematics teachers teach and pursue their pre-service training and in-service professional development. The second section presents studies investigating a wide range of issues at both the macro and micro levels on how Chinese mathematics teachers teach mathematics. The third section focuses on Chinese mathematics teachers investigating issues about their knowledge, belief, teacher training and professional development. Like its predecessor *How Chinese Learn Mathematics: Perspectives from Insiders*, this book is a must for educational researchers, practitioners and policy makers who are interested in knowing more about mathematics teaching, teachers' teacher education and professional development concerning Chinese teachers and learners.
