graduate courses in reading methods This user friendly resource offers a selection of broad based and stimulating strategies to assist teachers in developing lessons that will advance students reading abilities The author designs strategies to motivate and to encourage reading to help improve the teaching learning process and to plan for appropriate instruction It is assumed that students have developed a theoretical framework about literacy before using these strategies The text addresses all standard literacy topics and is appropriate for instructing beginning through intermediate level readers It emphasizes the practical application of theory and would be helpful to use in coursework connected directly to field based practicums in schools or as a resource guide for student teachers as well as for literary remediation

**Reading Problems** Joyce Holt Jennings, JoAnne Schudt Caldwell, Janet W. Lerner, 2006 Would the world be a better place if human societies were somehow able to curb their desires for material goods Saleem Ali s pioneering book links human wants and needs by providing a natural history of consumption and materialism with scientific detail and humanistic nuance It argues that simply disavowing consumption of materials is not likely to help in planning for a resource scarce future given global inequality development imperatives and our goals for a democratic global society Rather than suppress the creativity and desire to discover that is often embedded in the exploration and production of material goods which he calls the treasure impulse Ali proposes a new environmental paradigm one that accepts our need to consume treasure for cultural and developmental reasons but warns of our concomitant need to conserve In evaluating the impact of treasure consumption on resource rich countries he argues that there is a way to consume responsibly and alleviate global poverty

**Approaches to the Informal Evaluation of Reading** John J. Pikulski, Timothy Shanahan, 1982 The eight articles in this compilation provide various approaches and techniques for use by classroom teachers in the informal evaluation of student reading performance The first article outlines the many purposes for which informal measures may be used and briefly describes the various forms such measures may take while the second focuses on teacher observation and addresses the testing concepts of reliability and validity The third article discusses the manner in which oral reading should be evaluated and how measures of oral reading should be interpreted and the fourth offers suggestions for evaluating decoding as well as comprehension skills The fifth article reviews the many forms that cloze techniques can take illustrates the breadth of informal evaluation procedures and offers instructions for the construction and interpretation of cloze tests The sixth article provides suggestions as to how content area teachers can use informal procedures with their students and the seventh illustrates the interrelationships of the language skills by noting that if teachers begin to analyze the writing students produce they will gain many insights into the general language skills their students possess The final paper reviews research indicating the values and limitations of informal reading inventories FL
