Developing Teachers Developing Schools Making Inset Effective For The School:

Developing Teachers, Developing Schools Howard Bradley, Colin Conner, Geoff Southworth, 1994 School development and staff development are fundamentally inter dependent This book presents a range of ways in which INSET is being and can be used to improve schools performance and benefit individual teachers within the school system Teachers Learning Colleen McLaughlin, 2013 This book is part of The Cambridge Teacher series edited by senior colleagues at the University of Cambridge Faculty of Education which has a longstanding tradition of involvement in high quality innovative teacher education and continuing professional development Performance Management in Education Pauline Smith, Christine Forde, 2002-06-03 This book provides an overview of some of the key issues in developing professional performance and examines critically some of the key strategies that can be used to enhance professional performance *Education, Professionalism and the Quest for Accountability* Jane Green, 2011-05-20 Today workers based in institutions designed to serve the public teachers nurses social workers community officers librarians civil servants etc are expected to reorganize their thoughts and practice in accordance with a performance management model of accountability which encourages a rigid bureaucracy one which translates regulation and monitoring procedures into inflexible and obligatory compliance This book shows how and why this performance model may be expected paradoxically to make practices less accountable and in the case of education less educative **Professional Learning as Relational Practice** Jenny Reeves, 2010-04-07 Given the emphasis on transforming professional work through the adoption of enquiry based and trans disciplinary approaches to service development there is an urgent need for those involved in professional education to develop a robust understanding of how changes in practice occur A more inclusive approach to the analysis of the processes involved across the varied and interrelated contexts in which they occur is thus very timely In this book Jenny Reeves sets out to explore the gap between the experience of professional learning as an interactive dynamic and socially contextualised process and descriptions that are often individualistic overly linear and largely context free She makes the claim that this disjuncture is the outcome of modes of enquiry that concentrate on limited selections of the available data Adopting a relational approach to describing practice based professional development including graphical means for exploring the spaces produced by the activity provides a very different picture It creates a basis for representing the complex movements relationships and interactions between people and things that occur during professional learning It also provides a productive approach to describing the exchange and creation of professional knowledge across different contexts over time By building a picture of the ephemeral spaces and connections that educating activities produce mapping relational space allows those engaged in professional education to think rather differently about how professional learning and changes in knowledge and practice may be understood supported and developed *Managing Continuing Professional Development in Schools* British Educational Management and Administration Society, 1997-04-28 Based on experience in schools this analysis of continuing professional

development in schools acts as a guide for teachers and for those entering the profession It includes case studies which explore good practice at all stages of the teacher s career Reflective Action Planning for Teachers David Frost,1997 This book is a practical step by step guide to reflective action planning a teacher led approach to initiating and sustaining educational change It demonstrates how secondary and primary teachers can contribute fully to the improvement of their school while developing their own professional potential It provides guidelines for school managers higher education tutors external consultants and LEA advisers engaged in establishing cost effective school based support It demonstrates how this approach can facilitate accreditation for those pursuing diplomas or higher degrees in school development entirely through school based work Facsimiles checklists formats and other practical tools are provided for use in school based programmes
