Development and Disabilities Robert M. Hodapp,1998-10-13 This book offers a multi disability approach to children with mental retardation deafness blindness and motor impairments The Development of Disability Rights Under International Law Arlene S. Kanter,2014-11-27 The adoption of the Convention on the Rights of People with Disabilities CPRD by the United Nations in 2006 is the first comprehensive and binding treaty on the rights of people with disabilities It establishes the right of people with disabilities to equality dignity autonomy full participation as well as the right to live in the community and the right to supported decision making and inclusive education Prior to the CRPD international law had provided only limited protections to people with disabilities This book analyses the development of disability rights as an international human rights movement Focusing on the United States and countries in Asia Africa the Middle East the book examines the status of people with disabilities under international law prior to the adoption of the CPRD and follows the development of human rights protections through the convention s drafting process Arlene Kanter argues that by including both new applications and entirely new approaches to human rights treaty enforcement the CRPD is significant not only to people with disabilities but also to the general development of international human rights by offering new human rights protections for all people Taking a comparative perspective the book explores how the success of the CRPD in achieving protections depends on the extent to which individual countries enforce domestic laws and policies and the changing public attitudes towards people with disabilities This book will be of excellent use and interest to researchers and students of human rights law discrimination and disability studies *A Comprehensive Guide to Intellectual and Developmental Disabilities* Michael L. Patel, Donald E. Greydanus, Hatim A. Omar, Joav Merrick, 2011-04-07

Increasingly more and more children with developmental disabilities survive into adulthood Pediatricians and other clinicians are called upon to care for an increasing number of children with developmental disabilities in their practice and thus there is a need for a practical guide specifically written for paediatricians and primary care clinicians that addresses major concepts of neurodevelopmental pediatrics In the United States the specialty training leading to a conjoint board certification by the American Board of Pediatrics and American Board of Psychiatry and Neurology requires a total of 6 years of training 2 years of pediatrics 1 year of neurology 18 months of child neurology 18 months of neurodevelopmental disabilities As of December 2006 in the US there were 241 pediatricians and 55 child neurologists certified in the subspecialty of Neurodevelopmental Disabilities Thus most of the children with developmental disabilities are seen by pediatricians and therefore it is important for these pediatricians to be well informed of common issues in the field The 60 000 or so pediatricians in the United States and hundreds more in other countries are the main target audience for a practical book on neurodevelopmental pediatrics **Play development in children with disabilities**

Serenella Besio, Daniela Bulgarelli, Vaska Stancheva-Popkostadinova, 2017-04-24 This book is the result of the first two year work of Working Group 1 of the network LUDI Play for children with disabilities LUDI is an Action 2014 2018 financed by COST it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health WHO 2001 The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over Europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the

status of a scientific and social theme of full visibility and recognized authority Children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies Moreover disabled children s lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time The concept of play for the sake of play strongly refers to the distinction between play activities and play like activities Play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competition ilinx and dizziness etc They have of course consequences on growth and development but these consequences are not intentionally pursued Play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e g cognitive learning social learning functional rehabilitation child s observation and assessment psychological support psychotherapy etc This book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies
