*Anthropology and Development* Katy Gardner, David Lewis, 2015-02-20

Western aid is in decline Non traditional development actors from the developing countries and elsewhere are in the ascendant A new set of global economic and political processes are shaping the twenty first century This book engages with nearly two decades of continuity and change in the development industry In particular it argues that while the world of international development has expanded since the 1990s it has become more rigidly technocratic The authors insist on a focus upon the core anthropological issues surrounding poverty and inequality and thus sharply criticise what are perceived as problems in the field

*Anthropology and Development* is a completely rewritten edition of the best selling and critically acclaimed *Anthropology Development and the Post Modern Challenge* 1996 It serves as both an innovative reformulation of the field as well as a textbook for many undergraduate and graduate courses at leading international universities

**Technical Knowledge and Development** Thomas Grammig, 2004-01-14

Development and aid projects often fail to improve technological capacity Their reform has been a widely acknowledged challenge for three decades This book demonstrates

theoretically and empirically how aid practitioners shape the organizational social and inter cultural dynamics of development projects in industry      *Training Manual in Development Anthropology* William L. Partridge,1984

*Anthropology, Development and the Post-Modern Challenge* Katy Gardner,David Lewis,1996-05-20 A well crafted sensitive reflective and constructive book It is highly recommended Development Policy Review      **Why we need a revolution in the Social sciences: A post-colonial perspective** Sujay Rao Mandavilli,2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors      *Development Anthropology: Encounters in the Real World* Riall W. Nolan,2002      *Methods For Social Analysis In Developing Countries* Kurt Finsterbusch,2019-04-05 This book fills the gap between social science methodology books and the realities of conducting social research under Third World conditions It focuses on social impact assessment methods and cost effective social analyses for development projects and programs in US and Third World countries      **Development from Below** David C.
