

Childhood Speech & Hearing Disorders

A new study in *Pediatrics* shows speech and hearing disorders are growing causes of disability for U.S. children.

Between 2001-2011, **speech disorders** increased by **63%**.

Hearing disorders increased by nearly **16%**.

Yet, separate research has shown that only **14%** of surveyed experts say patients are aware of the **importance of early detection**.

Early intervention is transformative.

Many communication disorders can be reversed or even prevented with early treatment.

Early intervention is efficient.

Early treatment takes less time and money. Every \$1 spent in early age saves \$7 in education/services later on.

Early intervention is necessary.

Early treatment can help prevent children from falling behind developmentally, academically, and socially.

Early treatment is accessible.

Speech-language pathologists and audiologists are employed in early intervention programs, in schools, in private practice, and in diverse health care settings.
