Development of Ladakh Himalaya Prem Singh Jina, 2003
Jina, 1997 **Recent Researches in Geology: Recent developments in geology** Anant Gopal Jhingran, Virendra Kumar Verma, R. C. Misra, 1982 Water and Sacred Architecture Anat Geva, 2023-05-25 This edited book examines architectural representations that tie water as a physical and symbolic property with the sacred. The discussion centers on two levels of this relationship: how water influenced the sacredness of buildings across history and different religions, and how sacred architecture expressed the spiritual meaning of water. The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region. As such, this unique volume adds a new dimension to the study of sacred architecture. The book's chapters are compiled by a stellar group of scholars and practitioners from the US, Canada, Europe, Asia, and Africa. It addresses major aspects of water in religious buildings, such as rituals, pilgrimage, water as a cultural material, and place making. Hydro systems, modern practices, environmental considerations, the contribution of water to transforming secular into sacred, and future digital cyber context of water and sacredness. All chapters are based on original archival studies, historical documents, and field visits to the sites and buildings. These examinations show water as an expression of architectural design, its materiality, and its spiritual values. The book will be of interest to architects, historians, environmentalists, archaeologists, religious scholars, and preservationists. Bird Migration across the Himalayas Herbert H. T. Prins, Tsewang Namgail, 2017-04-06 Birds migrating across the Himalayan region fly over the highest peaks in the world, facing immense physiological and climatic challenges. The authors show the different strategies used by birds to cope with these challenges. Many wetland avian species are seen in the high altitude lakes of the Himalayas and the adjoining Tibetan Plateau, such as Bar-headed Geese. Ringing programmes have generated information about origins and destinations, and this book is the first to present information on the birds' exact migratory paths. Capitalising on knowledge generated through satellite telemetry, the authors describe the migratory routes of a multitude of birds flying over or skirting the Himalayas. The myriad of threats to migratory birds and the wetland system in the Central Asian Flyway are discussed, with ways to mitigate them. This volume will inform and persuade policy makers and conservation practitioners to take appropriate measures for the long-term survival of this unique migration. Understanding Climate Change through Religious Lifeworlds David L. Haberman, 2021-05-04 How can religion help to understand and contend with the challenges of climate change? Understanding Climate Change through Religious Lifeworld edited by David Haberman presents a unique collection of essays that detail how the effects of human-related climate change are actively reshaping religious ideas and practices, even as religious groups and communities endeavor to bring their traditions to bear on mounting climate challenges. People of faith from the low-lying islands of the South Pacific to the glacial regions of the Himalayas are influencing how their communities

understand earthly problems and develop meaningful responses to them This collection focuses on a variety of different aspects of this critical interaction including the role of religion in ongoing debates about climate change religious sources of environmental knowledge and how this knowledge informs community responses to climate change and the ways that climate change is in turn driving religious change Understanding Climate Change through Religious Lifeworlds offers a transnational view of how religion reconciles the concepts of the global and the local and influences the challenges of climate change

Mountain Research and Development ,1996 *Urban Mountain Waterscapes in Leh, Indian Trans-Himalaya* Judith Müller,2022-11-16 The city of Leh is located in the high mountain desert of Ladakh in the Indian Himalayas and access to water has always been limited there In recent years the town has experienced high rates of urbanisation on the one hand and tourist numbers have increased exponentially on the other which has implications for the water supply of the people living there Through several years of on site research challenges on various levels were documented and current governance approaches were analysed This research forms the basis for future approaches to sustainable development **Navigating Globalization, Diaspora, Foreign Policy and Sustainability** Aditya Anshu,2025-12-01 Collecting the ideas of a dozen young scholars this book investigates the symbiotic relationships among globalization diaspora foreign policy sustainability and the profound psychological effects that ensue This synthesis of diverse disciplines paints a vivid portrait of our interconnected world offering a nuanced understanding of the challenges and opportunities including sustainability and climate issues Readers are taken on a journey through the complex shade of diaspora unravelling the significant role played by global communities in bridging cultural divides and fostering international networks The examination of foreign policy dynamics provides insights into how nations navigate the evolving global terrain responding to the interconnected challenges of the 21st century This book will be of interest to scholars of globalization diaspora and those seeking visions of the future
