Inventory of Federal Energy-related Environment and Safety Research for FY 1978, 1979 *Global Technology Transfer* John Chumack, 2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out This book presents the issues and offers a comprehensive bibliography for easy access Inventory of Federal Energy-related Environment and Safety Research for FY 1978: Project listings and indexes, 1979 *Business Responsibility for Environmental Protection in Developing Countries* United Nations Research Institute for Social Development, 1998 **CEPA Review, the Government Response** Canada, CEPA Office (Canada), 1995 The Canadian Environmental Protection Act CEPA was proclaimed in force in 1988 with the provision that there would be a review of its adequacy within five years A House of Commons committee undertook such a review in 1994 and tabled its report in 1995 This document is the government response to that report The introduction sets out the context in which a renewed CEPA is being proposed and discusses the need for a cooperative approach and the importance of integrating environmental considerations into economic decision making The second part summarizes each

chapter of the government response and the third part sets out specific proposals for each chapter along with a brief explanation of the problems these proposals are addressing There is also reference to current arrangements with other jurisdictions and stakeholders for managing these problems as well as the benefits to the public government partners and stakeholders of proceeding as proposed

Industry and Environment ,1994 Abstracts of Public Administration, Development, and Environment ,1993 **Materials Processing Technology and Environmental Protection in Mining and Metallurgy** W. J. Thoburn, Metallurgical Society of CIM., P. W. Godbehere, A. J. Oliver, Canadian Institute of Mining, Metallurgy and Petroleum, R. Walli, 1993 **Transfer of Pollution Prevention Technologies** National Research Council, Division on Engineering and Physical Sciences, Board on Manufacturing and Engineering Design, Committee to Evaluate Transfer of Pollution Prevention Technology for the U.S. Army, 2002-05-01

The activities of the Department of Defense DOD and its contractors in manufacturing testing maintaining and disposing of military equipment make up a significant portion of the industrial processes conducted in the United States As is the case with the commercial industries some of these activities such as metal plating have resulted in industrial pollution and environmental contamination With increasing environmental regulation of such processes in recent decades defense facilities have been faced with growing compliance issues Department of Defense efforts to manage correct and prevent these problems have included the establishment of the National Defense Center for Environmental Excellence NDCEE under the management of the U S Army Industrial Ecology Center IEC The National Research Council s Committee to Evaluate Transfer of Pollution Prevention Technology for the U S Army was formed to identify major barriers to the transfer of pollution prevention technologies and to recommend pathways to success To address the study objectives the committee 1 reviewed the NDCEE s technology transfer activities 2 examined efforts to transfer technology in four areas two of which were identified at the outset by the NDCEE as successful and two of which were identified as unsuccessful and 3 identified opportunities for improving the transfer of pollution prevention technologies to maintenance and rework facilities in the Department of Defense and to industrial manufacturing facilities performing defense related operations

Recent Advances and Issues in Environmental Science Joan R. Callahan, 2000 The changes and significant developments that have accompanied the relatively young field of environmental science are documented in this addition to the Oryx Frontiers of Science Series From major causes for environmental concern to possible solutions Environmental Science presents a balanced and comprehensive view of the collective fields of ecology sociology demography and waste management Special focus is on important environmental events and discoveries that occurred between 1996 and 1999 Additionally related information is presented on key people career opportunities organizations resources and more This is a must have reference tool for understanding a larger view of environmental science

Waste Minimization and Pollution Prevention Technology Transfer ,1998 The Airlie House Pollution Prevention Technology Transfer Projects were a series of pilot projects developed for the US Department of Energy

with the intention of transferring pollution prevention technology to the private sector The concept was to develop small technology transfer initiatives in partnership with the private sector Argonne National Laboratory developed three projects the microscale chemistry in education project the microscale cost benefit study project and the Bethel New Life recycling trainee project The two microscale chemistry projects focused on introducing microscale chemistry technologies to secondary and college education These programs were inexpensive to develop and received excellent evaluations from participants and regulators The Bethel New Life recycling trainee project provided training for two participants who helped identify recycling and source reduction opportunities in Argonne National Laboratory s solid waste stream The pilot projects demonstrated that technology transfer initiatives can be developed and implemented with a small budget and within a short period of time The essential components of the pilot projects were identifying target technologies that were already available identifying target audiences and focusing on achieving a limited but defined objective
