Development Factory Unlocking The Potential Of Process Innovation:

The Development Factory Gary P. Pisano,1997 When the pharmaceuticals giant Merck reports promising results for a potential blockbuster drug the story makes the evening news Now at a time when new product development has become critical to success in so many industries The Development Factory proves that process innovation not just product innovation can be the key to competitive edge In this multiyear study of pharmaceutical and biotechnology firms Gary Pisano explores the dynamics of superior product and process development in a highly competitive industry that lives and dies by its R D and depends heavily on rapid time to market His work reveals that behind the success of many new product introductions lies the development of novel process technologies that provide lower costs higher quality and increased flexibility Pisano challenges the widely held product process life cycle view of competition which suggests that industries tend to emphasize either product innovation or process innovation He also questions the notion that there is a conflict between pursuit of product innovation and pursuit of lower costs arguing that product development and process development capabilities are complementary Extending the lessons to a wide variety of manufacturing industries The Development Factory will guide companies toward unlocking the potential of process development and understanding the patterns of organizational behavior and managerial actions that help create and implement new capabilities over time **Development Factory** Gary P.

Pisano,1997 Process Understanding Ian Houson,2011-05-23 Process Understanding For Scale Up and Manufacture of Active Ingredients Process Understanding is the underpinning knowledge that allows the manufacture of chemical entities to be carried out routinely robustly and to the required standard of quality This area has gained in importance over the last few years particularly due to the recent impetus from the USA s Food and Drug Administration This book covers the multidisciplinary aspects required for successful process design safety modeling scale up PAT pilot plant implementation plant design as well the rapidly expanding area of outsourcing In discussing what process understanding means to different disciplines and sectors throughout a product s life cycle this handbook and ready reference reveals the factors important to the development and manufacture of chemicals The book focuses on the fundamental scientific understanding necessary for a smoother technical transfer between the disciplines leading to more effective and efficient process development and manufacturing A range of case studies are used to exemplify and illustrate the main issues raised As a result readers will appreciate that process understanding can deliver a real competitive advantage within the pharmaceuticals and fine chemicals industry This book serves as an aid to meeting the stringent regulations required by the relevant authorities through demonstrable understanding of the underlying science **Managing Product Innovation In The Process**

Industries: From Customer Understanding To Product Launch - Uncover The Intrinsic Nature Of Developing Non-assembled Products Thomas Lager,2024-04-29 This book puts management of product innovation in a corporate strategic perspective and argues that a company s competitive position is strongly related to an underlying unique and

continually renewed product innovation work process which drives innovation and delivery of new or improved products in the marketplace The book will take the reader through a systematic examination of the necessary consecutive steps for companies successful development of non assembled products in the cluster of process industries For readers in search of a seamless easy to use effective formal product innovation work process from customer understanding to product launch this book provides a guiding framework and hands on advice for work process design A novel five phase structural process model of the product innovation work process is initially introduced in order to orchestrate a more dynamic interaction between product and process innovation and the integration of sustainability and product eco design in product design The reader will learn first about the importance of aligning new product ideas with the corporate business model and product innovation strategy during the contextualization phase and then how to transform product ideas into well defined complementary product and process concepts In the movement of product ideas from the conceptualization phase to industrialization the use of pilot planting and production trials for scale up of product and process concepts is further explored To secure a design for processability a novel industrialization sub process is introduced and the integration of complementary development of product and service offerings is further examined The deployment of application development throughout and after product launch is highlighted for an enhancement of product commercialization and a reduction of time to break even for new products

Jean-Pierre Dal Pont, Catherine Azzaro-Pantel, 2014-07-09 Competition from emerging and developing countries challenges related to energy and water the continuing increase in the global population and the obligation to be sustainable are all impacting developed countries such as the United States France etc Manufacturing has been almost totally neglected by these developed countries and thus there is a strong need to review R D and the development and industrialization processes This is a prerequisite for maintaining and improving welfare and quality of life The industrialization process can be defined as the process of converting research or laboratory experiments into a physical tool capable of producing a product of value for customers of specified markets Such a process implies knowledge of BAT best available techniques in chemical engineering plant design production competitiveness the proper utilization of tools toolbox concept such as value assessment value engineering eco design LCA lifecycle analysis process simulation modeling innovation and appropriate metrics usage These

are mandatory to ensure commercial success and covered by the authors of this book **The Strategy of Managing Innovation and Technology** Murray R. Millson, David L. Wilemon, 2008 For undergraduate courses in Innovation and Creativity or for graduate students in schools of management business or engineering and technology management programs A comprehensive collection of research illustrating advances in innovation over the past century this unique anthology equips its readers with the knowledge and tools to construct a model of innovation and effectively implement it in both business and non business settings The world continues to change at an accelerating pace The concepts developed in this vast collection of research represent a large part of the study of innovation and technological progress for the past century An excellent resource for students and practitioners it offers readers in depth insight into many of the areas that influence and are influenced by the innovation process giving them an excellent perspective for conceptualizing the innovation process

Harvard Business Review ,1997 Harvard Business School Bulletin ,1997 *Management* Thomas S. Bateman, Scott Snell, 2007 **Managing Innovation** Joseph Tidd, J. R. Bessant, Keith Pavitt, 1997-06-26 Technologies are increasingly complex and expensive markets are more competitive and products and services more difficult to differentiate In such an environment organizations achieve competitive advantage through innovation They must approach innovation in its broadest sense including technological development marketing strategies and new work practices The corporate capacity for continuous change must be dramatically increased Management must understand how to translate new technologies and market opportunities into successful products and services The scope of this book is unique It seeks to integrate the fields of technological market and organizational innovation Based on European Asian and American best practice experience and the latest research in management *Managing Innovation* demonstrates that it is no longer sufficient to focus on a single dimension of innovation Instead it takes an integrative and holistic approach to the management of innovation It does this by the use of three key themes the identification and development of core competencies the constraints imposed by different technologies and markets and the structures and processes for organizational learning The use of these themes provides managers with the knowledge to understand and the skills to exploit innovation at both strategic and operational levels Designed for MBA and MSc courses in the management of technology and innovation *Managing Innovation* will also be relevant to managers at all levels in both manufacturing and service sectors The journal of product innovation management Product Development & Management Association (United States), 1986 Issues in Science and Technology ,1996 **Journal of Management** Southern Management Association, 2003 **Osaka City University Business Review** ,2001 *Strategy & Business* ,2007
