## Development Of Modern France Volume 1:

**Class and Colonialism in Antarctic Exploration, 1750-1920** Ben Maddison, 2015-10-06 Between 1750 and 1920 over 15 000 people visited Antarctica. Despite such a large number, the historiography has ignored all but a few celebrated explorers. Maddison presents a study of Antarctic exploration, telling the story of these forgotten facilitators; he argues that Antarctic exploration can be seen as an offshoot of European colonialism.

**History of Modern France, Vol. 1** ALFRED. COBBAN, 1962 Surrealism, History and Revolution Simon Baker, 2007 This book is a new account of the surrealist movement in France between the two world wars. It examines the uses that surrealist artists and writers made of ideas and images associated with the French Revolution, describing a complex relationship between surrealism's avant garde revolt and its powerful sense of history and heritage. Focusing on both texts and images by key figures such as Louis Aragon, Georges Bataille, Jacques Andr Boiffard, Andr Breton, Robert Desnos, Max Ernst, Max Morise, and Man Ray, this book situates surrealist material in the wider context of the literary and visual arts of the period through the theme of revolution. It raises important questions about the politics of representing French history, literary and political memorial spaces, monumental representations of the past, and critical responses to them, imaginary portraiture, and revolutionary spectatorship. The study shows that a full understanding of surrealism requires a detailed account of its attitude to revolution, and that understanding this surrealist concept of revolution means accounting for the complex historical imagination at its heart.

*The State and Business in the Major Powers* Robert Millward, 2013-03-12 In the 19th and early 20th centuries, the state emerged as a major player in the economies of the Western World. This important new volume provides an economic history for the period 1815-1939 of state-business relations in the major powers: France, Germany, Japan, Russia, UK, and the USA. The book challenges the traditional story that the scale of state intervention reflected the degree to which each country was ideologically committed to laissez faire, and which also tended to assume that governments were interested in economic growth and raising average living standards. Robert Millward gives a rather different perspective, arguing that the scale of state intervention and the differences across countries were motivated more by considerations of external defence and internal unification than by any notions of promoting economic growth or adherence to laissez faire. This book provides for the first time an integrated economic history of these state-business relations in the major powers in the period 1815-1939 and offers a completely new perspective on the links between tariff policies, state enterprise in manufacturing, the treatment of the peasantry, regulation of railways, taxation of the business sector, policies on cartels, trusts, and competition.
