A Beginner's Guide to Introduce Artificial Intelligence in Teaching and Learning Muralidhar Kurni, Mujeeb Shaik Mohammed, Srinivasa K G, 2023-06-28 This book reimagines education in today's Artificial Intelligence AI world and the Fourth Industrial Revolution. Artificial intelligence will drastically affect every industry and sector, and education is no exception. This book aims at how AI may impact the teaching and learning process in education. This book is designed to demystify AI for teachers and learners. This book will help improve education and support institutions in the phenomena of the emergence of AI in teaching and learning. This book presents a comprehensive study of how AI improves teaching and learning from AI-based learning platforms to AI-assisted proctored examinations. This book provides educators, learners, and administrators on how AI makes sense in their everyday practice. Describing the application of AI in ten key aspects, this comprehensive volume prepares educational leaders, designers, researchers, and policymakers to effectively rethink the teaching and learning process and environments that students need to thrive. The readers of this book never fall behind the fast pace and promising innovations of today's most advanced learning technology. *Implementing AI Tools for Language Teaching and Learning* Pham, Vu Phi Ho, Lian, Andrew, Lian, Ania, Barros, Sandro R., 2025-04-30 The implementation of artificial intelligence AI tools has revolutionized language education. For teachers and students, it provides more options for personalized learning that can be utilized inside or outside of the classroom with real-time feedback. While AI has been pivotal in making language education accessible for students, including those in special education, it has its drawbacks in terms of algorithm bias, decreased human interaction, and security concerns. This calls for responsible use of AI in language education and further professional development for teachers to enhance their experience of language learning. *Implementing AI Tools for Language Teaching and Learning* explores the advancement of digital technology in language education and the implications it has for the future of learning. It covers various AI-driven applications for language acquisition and translation, as well as the impact they may have on students' cognitive abilities and performance. Covering topics such as essay writing skills, long short-term memory (LSTM) models, and handwritten text recognition, this book is an excellent resource for language educators, policymakers, professionals, researchers, academicians, and more. Knowledge as a Feeling Troy A. Swanson, 2023-05-08 Much of information science theory assumes a type of rationality in how individuals process the world around them, but the impact of misinformation and disinformation, along with the polarization of society into competing information factions, calls for new understandings around our relationships to information. Advances in neuroscience and psychology shed new light on how the brain processes information using both conscious and unconscious systems. Current theory in neuroscience emphasizes that the mind is not a unified whole but a network of networks constructing reality to anticipate needs. Knowledge is not a rational process but centers around the feeling of knowing, which is the net output of competing brain processes. The feeling of knowing assumes a group context and offers a social epistemological stance that

judges knowledge within this group context With knowledge built into groups power dynamics allow work to be accomplished but also privilege some group members over others The feeling of knowing has significant implications for information science challenging theoreticians and practitioners to reconsider how individuals process information For information behavior the feeling of knowing offers a fuller picture looking at conscious and unconscious processing in the production of knowledge For information literacy the feeling of knowing sheds light on how individuals evaluate information and synthesize new sources into their existing knowledge Ultimately the feeling of knowing leads us toward new reflective and metacognitive tools that help meet this moment in the evolution of our information ecosystem This book explores the idea that knowing is a feeling that results from the interactions of the brain s unconscious and conscious processes and not through the accumulation of facts It s intended to help librarians educators and information scientists better understand what neuroscience and psychology are teaching about what it means to know and how our brain learns *Andragogy in Practice* Elwood F. Holton, Petra A. Robinson, Corina Caraccioli, 2025-06-30

Andragogy in Practice is a timely book of case studies which offers readers the opportunity to see andragogy in practice solving real world challenges in a variety of adult learning contexts It highlights the wonderful range of innovative practices that characterize adult learning today Holton Robinson and Caraccioli authors of the bestselling *The Adult Learner* bring a variety of diverse and inspiring extended cases together from a range of experienced teaching and learning specialists Showing the broad scope power and potential of adult learning using andragogy case topics include Artificial Intelligence Online Learning in Higher Education Human Resource and Leadership Development Curriculum and Faculty Development and Art Based Learning The book can be used in conjunction with *The Adult Learner* or as a standalone text and provides a wealth of resources for educators students and practitioners looking to further their understanding of how andragogy is being applied in new and innovative ways Experienced adult educators will be challenged to be more innovative in their own practices For reflection and further dialog each case includes a set of discussion questions to enhance engagement and understanding Students and practitioners of human resource development and adult education will enjoy the engaging innovative and insightful cases in this book addressing andragogical practices in the contemporary society **The AI Chatbot for Teachers** Sheila Sonne, 2024-04-15
