key questions How do users perceive search engines and what is their understanding of how they work What are the various user interface designs contemporary and historical that have created access points to search and how do these interfaces affect each other and a user s search process What do these designs and products say about our priorities and our relationships with information and other people This book weaves archival and contemporary examples of interface designs together with the results of user research conducted by the author These user studies focus on how people utilize various platforms apps and interfaces in their quest for information answers and meaning Current research from the fields of user experience design interaction design and information design is integrated throughout to expand on these ideas and provide larger takeaways This book is crucial reading for advanced students scholars and professionals in the fields of design specifically user experience and interaction design media and cultural studies information science and design studies

Technology and the Overturning of Human Autonomy Simona Chiodo,2023-04-26 This book offers an extensive historical philosophical and ethical discussion on the role of autonomous technologies and their influence on human identity By connecting those different perspectives and analysing some practical case studies it guides readers to dissect the relationship between machine and human autonomy and machine and human identity It analyses how the relationship between human and technology has been evolving in the last few centuries Last it aims at proposing an explanation on the reasons why humans have been keen on developing their own autonomy s perfect avatar **Algorithms for the People**

Josh Simons,2025-07-08 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In *Algorithms for the People* Josh Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance Drawing on his experience as a research fellow at Harvard University a visiting research scientist on Facebook s Responsible AI team and a policy advisor to the UK s Labour Party Simons gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the institutions that build and use them He argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy
