La destination Sénégal : transformations et stratégies

managériales à l'ère du numérique Mamadou Diombéra,2022-10-25 Cet ouvrage analyse les mutations liées aux transformations numériques en cours ou venir dans le secteur du tourisme Il interpelle les décideurs pour sauver la destination Sénégal en raison des enjeux touristiques qui risquent de croître avec un horizon parsemé d'embûches pour la promotion du pays L'ouvrage propose des recommandations en matière d'innovation dans le secteur du tourisme dans un contexte où une attention particulière est portée à la relance de l'activité en cette période post covid 19

Organismes de gestion de destination Laurent Botti,Jacques Spindler,2021-09-14 Il peut paraître paradoxal de s'intéresser au secteur du tourisme alors que nos mobilités même les plus basiques sont réduites cause de la pandémie liée au coronavirus qui a provoqué un choc mondial particulièrement brutal et profond tant sur le plan social que dans le domaine des affaires Au-delà d'une phase de réanimation économique une stratégie de sortie de crise doit être déployée dans tous les secteurs notamment celui du tourisme en promouvant massivement les atouts de nos destinations et offres de services auprès des clients nationales et étrangères qui ont besoin d'être rassurés même si les pratiques touristiques se trouvent modifiées par cette dépression exceptionnelle Il est donc plus que nécessaire de s'interroger sur le développement et l'avenir des territoires touristiques mission des Organismes de Gestion de Destination OGD qui savent que si le tourisme d'après est susceptible d'être différent du tourisme d'avant ils doivent tout faire pour le rendre meilleur

The Report: Côte d'Ivoire 2015 Oxford Business Group,2015-03-19 The IMF forecasts over 7.5% average growth through to 2017 but attracting private investment both to large infrastructure developments and lower profile industrial projects will be key to ensuring social stability Despite regional competition from Senegal and Ghana in terms of investment attractiveness Côte d'Ivoire is likely to regain its place as an economic centre if it can successfully revise its hard and soft infrastructure Although progress has been made the possibility of political unrest remains prompting concerns over the presidential elections set for October 2015 The preservation of peace and economic recovery will depend on the outcome of the elections and the ability of the new government to continue the reconciliation agenda

Destinations ,2005 **Fenland Survey** David Hall,John Coles,2014-02-15 Archaeological surveys of the Fenland of eastern England were initiated in the 1930s after it became clear that centuries of drainage and cultivation had seriously reduced the archaeological deposits These studies were among the first to take a multi disciplinary approach to archaeological work and continued with new work in the 1980s when intensive surveys were made of the wetlands of Cambridgeshire Lincolnshire Norfolk and Suffolk During the eight years of the Fenland Survey 1981-88 fieldworkers walked 250 000 hectares and initiated palaeoenvironmental investigations allied to a radiocarbon dating programme At the end of the survey in 1989-90 the survey results were evaluated and a programme of field investigations undertaken This volume is a synopsis of that work It provides an introduction to the traditional Fenland as perceived by both ancient and modern geographers explorers and historians and a summary of the complex environmental history of the region It is presented broadly according to the traditional archaeological periods Mesolithic to medieval but it also provides an overview of cultural continuity and of the response to changing conditions over 6000 years of history It concludes with some reflections on the present condition of the Fenland and the response of the archaeological community to the threats posed by recent agricultural and other practices

Vegetal Politics Lesley Head,Jennifer Atchison,Catherine Phillips,Kathleen Buckingham,2017-10-02 Cultural geography has a long and proud tradition of research into human plant relations However until recently that tradition has been somewhat disconnected from conceptual advances in the social sciences even those to which cultural geographers have made significant contributions With a number of important exceptions plant studies have been less explicitly part of more than

human geographies than have animal studies This book aims to redress this gap recognising plants and their multiple engagements with and beyond humans Plants are not only fundamental to human survival they play a key role in many of the most important environmental political issues of the century including biofuels carbon economies and food security This innovative collection explores themes of belonging practices and places Together the chapters suggest new kinds of vegetal politics documenting both collaborative and conflictual relations between humans plants and others They open up new spaces of political action and subjectivity challenging political frames that are confined to humans The book also raises methodological questions and challenges for future research This book was published as a special issue of Social and Economic Geography *Book Review Index* ,2003 Vols 8 10 of the 1965 1984 master cumulation constitute a title index
