Donnelly, 1882 At the center of Donnelly's thesis are a set of similarities between widely separated cultures This he interpreted as evidence that all civilization diffused outward from a central point a now sunken continent in the mid Atlantic He cites mythological linguistic ethnographic and other evidence for this theory which at the time seemed to add up to an airtight case Donnelly proposes a literal interpretation of Plato's account of Atlantis He also ties Atlantis into the global flood myth complex These until recently have been two of the most compelling unsolved puzzles of history What was Plato writing about when he described the prehistoric civilization of Atlantis which disappeared overnight in a great catastrophe Was this an actual historical account or a philosophical fable And why do widely separated cultures on every continent Australia the Americas Europe and Asia all have a similar myth of a great flood from which only a few humans survived to restart civilization
