Determining Faculty Effectiveness John A. Centra, 1979

Reflective Faculty Evaluation John A. Centra, 1993-11-17 John A Centra provides faculty members administrators and faculty development specialists with the up to date approaches they need to evaluate and improve teaching He underscores the importance of active methods of teaching and the need to evaluate those methods in less traditional ways He discusses the value and proper use of self reports and portfolios and examines better ways to involve colleagues in evaluating and improving teaching

Effective Teaching in Higher Education Raymond P. Perry, John C. Smart, 1997 Assists academic staff to develop their effectiveness as teachers and improve their students learning by giving practical guidelines and suggestions for teaching and a series of activities

Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2002-12-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields

Grading the College Scott M. Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of

the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education
