Koshar,2000-11-09 Over the course of the twentieth century Germans have venerated and maintained a variety of historical buildings from medieval fortresses and cathedrals to urban districts and nineteenth century working class housing But the practice of historic preservation has sometimes proven controversial as different groups of Germans have sought to use historical architecture to represent competing versions of their nation s history *Transient Pasts* is the first book to examine the role that the historic preservation movement has played in German cultural history and memory from the end of the nineteenth century to the early 1970s Focusing on key public debates over historic preservation Rudy Koshar charts a trajectory of cultural politics in which historical architecture both facilitated and limited Germans efforts to identify as a nation He demonstrates that historical buildings and monuments have served as enduring symbols of national history in a country scarred by the traumas of two world wars Nazism the Holocaust and political division His findings challenge both the widely accepted argument that Germans have constantly repressed their past and the contention that Germany s intense public engagement with history since reunification is unprecedented **Deutsches Haus Bulletin** ,1929 The Deutsches Haus is the center of information in the United States concerning new publications in the German language The bulletins contain bibliographies of these publications **The National Union Catalog, Pre-1956 Imprints** Library of Congress,American Library Association. the way in which landscape and landscape heritage have been and still are used to define national identities It shows how national narratives use different types of landscapes Some nations use nature as their main point of reference partly to circumcise conflicts between different ethnic groups Other nations use agrarian landscapes that are often describes as timeless and rooted Again other nations use history as a major sources for defining identities In these cases myths of origins Golden Ages or wars and conflicts deliver the materials for national narratives The final section describes how nation states developed new urban as well as rural landscapes as national showpieces As landscapes are an important but under researched aspect of nation building this book fills a gap in the study of nationalism
