Deutschland Romantische Landschaften:

Handbuch Landschaft Olaf Kühne, Florian Weber, Karsten Berr, Corinna Jenal, 2024-05-07 Dieses Handbuch präsentiert unterschiedliche Perspektiven auf Landschaft und zeigt die Disziplinen mit ihren Landschaftsverständnissen auf. Ziel ist es, einen Überblick über den aktuellen Stand der Landschaftsforschung zu geben und gleichzeitig die Zukunft der Landschaftsforschung zu beleuchten. Die Autorinnen sind Expertinnen auf ihren Gebieten und im deutschen Sprachraum einschlägig bekannt.

Germany Olaf Kühne, Florian Weber, 2022-03-02 This book addresses the highly differentiated spatial, social, cultural, and demographic structures of Germany with a particular focus on the reciprocal relations between different levels of spatial development. The historical development of Germany serves as a background in order to provide context for the development of spatially relevant ideas and ideals, whether in relation to politics, landscape, or culture. In this regard, questions of divergence and convergence become highly salient. The book makes the complexity of spatial and social developments in Germany comprehensible. The neopragmatic approach adopted here allows bringing together different theoretical strands while providing a basis for independent regional geographic research at the same time. Beginning with an overview of the physical structures of Germany, which provides the material point of departure for the societal development of Germany, key aspects of the German history are discussed. Particular attention is paid to the reciprocal influence between material substrate and notions of landscape. Here, specific German trajectories of aesthetic and normative conceptions of landscape become clear. A common theme throughout the book are questions of divergence and of efforts towards convergence, which become evident when considering past and present economic, political, and demographic developments. Efforts to tackle current challenges such as adapting to climate change and mitigating it or securing raw materials also become apparent. The complexity of spatial processes in Germany is illustrated in case study regions dealing with the challenges of structural change in traditional industrial regions such as the Ruhr area or, e.g., efforts of Berlin to position and find itself as the capital of a unified Germany. Overall, the book shows how theory-driven regional geographic research can make spatiotemporal complexities tangible and comprehensible.
