"Devant Le Deluge" and Other Essays on Early Modern Scientific Communication David Abraham Kronick, 2004 All are topics that librarians as well as students and scholars interested in the philosophy sociology history and rhetoric of science will be certain to find enlightening and inspiring BOOK JACKET The Royal Society and the Discovery of the Two Sicilies Manuela D'Amore, 2017-08-09 This book illuminates a lesser known aspect of the British history of travel in the Enlightenment that of the Royal Society's special contribution to the discovery of the south of Italy in the age of the Grand Tour By exploring primary source journal entries of philosophy and travel the book provides evidence of how the Society helped raise the Fellows curiosity about the Mediterranean and encouraged travel to the region by promoting cultural events there and establishing fruitful relations with major Italian academic institutions. They were especially devoted to revealing the natural and artistic riches of the Bourbon Kingdom from 1738 to 1780 during which the Roman city of Herculaneum was discovered and Vesuvius and Etna were actively eruptive Through these examples the book draws attention to the role that the Royal Society played in establishing cultural networks in Italy and beyond Tracing a complex path starting in Restoration times this new insight into discourse on learned travel contributes to a more challenging vision of Anglo Italian relations in the Enlightenment Politics and Culture in 18th-Century Anglo-Italian Encounters Lidia De Michelis, 2019-06-04 This collection addresses Anglo Italian influences correspondences and relationships through the lens of an expansive notion of eighteenth century political history explored in its fecund dialogue with cultural history. Its multifaceted approach fleshes out the idea of the Enlightenment community of people linking and sharing different forms and structures of knowledge into a comprehensive picture of the Age of Reason This book probes fields of great relevance for the cultural interpretation of historical experience and composes a lively and as yet unexplored map of an interconnected European world Anglo Italian encounters are explored here primarily through the interweaving of political and cultural history adding a valuable cog to contemporary insight into the cosmopolitan nature of Enlightenment Europe The essays here range in scope from the public economy and international trade to finance moral philosophy the ethics and politics of translation travel the cosmopolitan impact of Italian music and taste and the art of gardening Science in Print Rima D. Apple, Gregory J. Downey, Stephen L. Vaughn, 2012-09-25 Ever since the threads of seventeenth century natural philosophy began to coalesce into an understanding of the natural world printed artifacts such as laboratory notebooks research journals college textbooks and popular paperbacks have been instrumental to the development of what we think of today as science But just as the history of science involves more than recording discoveries so too does the study of print culture extend beyond the mere cataloguing of books In both disciplines researchers attempt to comprehend how social structures of power reputation and meaning permeate both the written record and the intellectual scaffolding through which scientific debate takes place Science in Print brings together scholars from the fields of print culture environmental history science and technology studies medical history

and library and information studies This ambitious volume paints a rich picture of those tools and techniques of printing publishing and reading that shaped the ideas and practices that grew into modern science from the days of the Royal Society of London in the late 1600s to the beginning of the modern U S environmental movement in the early 1960s Invention of News Andrew Pettegree, 2014-02-01 A fascinating account of the gathering and dissemination of news from the end of the Middle Ages to the French Revolution and the rise of the newspaper Glenn Altschuler The Huffington Post Long before the invention of printing let alone the daily newspaper people wanted to stay informed In the pre industrial era news was mostly shared through gossip sermons and proclamations. The age of print brought pamphlets ballads and the first news sheets In this groundbreaking history renowned historian Andrew Pettegree tracks the evolution of news in ten countries over the course of four centuries examining the impact of news media on contemporary events and the lives of an ever more informed public The Invention of News sheds light on who controlled the news and who reported it the use of news as a tool of political protest and religious reform issues of privacy and titillation the persistent need for news to be current and for journalists to be trustworthy and people s changing sense of themselves and their communities as they experienced newly opened windows on the world This expansive view of news and how it reached people will be fascinating to readers interested in communication and cultural history Library Journal starred review Book Trade Catalogues in Early Modern Europe Arthur der Weduwen, Andrew Pettegree, Graeme Kemp, 2021-07-19 This edited collection offers in seventeen chapters the latest scholarship on book catalogues in early modern Europe Contributors discuss the role that these catalogues played in bookselling and book auctions as well as in guiding the tastes of book collectors and inspiring some of the greatest libraries of the era Catalogues in the Low Countries Britain Germany France and the Baltic region are studied as important products of the early modern book trade and as reconstructive tools for the history of the book These catalogues offer a goldmine of information on the business of books and they allow scholars to examine questions on the distribution and ownership of books that would otherwise be extremely difficult to pursue Contributors Helwi Blom Pierre Delsaerdt Arthur der Weduwen Anna E de Wilde Shanti Graheli Ann Marie Hansen Rindert Jagersma Graeme Kemp Ian Maclean Alicia C Montoya Andrew Pettegree Philippe Schmid Forrest C Strickland Jasna Tingle Marieke van Egeraat and Elise Watson

Introducing Science through Images Maria E. Gigante, 2018-06-01 An examination of how images can serve as communication tools to popularize science in the public eye As funding for basic scientific research becomes increasingly difficult to secure public support becomes essential Because of its promise for captivating nonexpert publics the practice of merging art and imagery with science has been gaining traction in the scientific community While images have been used with greater frequency in recent years their value is often viewed as largely superficial To the contrary Maria E Gigante posits in Introducing Science through Images the value of imagery goes far beyond mere aesthetics visual elements are powerful communication vehicles The images examined in this volume drawn from a wide range of historical periods serve an

introductory function that is they appear in a position of primacy relative to text and like the introduction to a speech have the potential to make audiences attentive and receptive to the forthcoming content Gigante calls them portal images and explicates their utility in science communication both to popularize and mystify science in the public eye Gigante analyzes how science has been represented by various types of portal images frontispieces portraits of scientists popular science magazine covers and award winning scientific images from Internet visualization competitions Using theories of rhetoric and visual communication she addresses the weak connection between scientific communities and the public and explores how visual elements can best be employed to garner public support for research Loath to Print Nicole Howard, 2022-04-05 Why did so many early modern scientific authors dislike and distrust the printing press While there is no denying the importance of the printing press to the scientific and medical advances of the early modern era a closer look at authorial attitudes toward this technology refutes simplistic interpretations of how print was viewed at the time Rather than embracing the press scientific authors often disliked and distrusted it In many cases they sought to avoid putting their work into print altogether In Loath to Print Nicole Howard takes a fresh look at early modern printing technology from the perspective of the natural philosophers and physicians who relied on it to share ideas She offers a new perspective on scientific publishing in the early modern period one that turns the celebration of print on its head Exploring both these scholars attitudes and their strategies for navigating the publishing world Howard argues that scientists had many concerns including the potential for errors to be introduced into their works by printers the prospect of having their work pirated and most worrisome the likelihood that their works would be misunderstood by an audience ill prepared to negotiate the complexities of the ideas particularly those that were mathematical or philosophical Revealing how these concerns led authors in the sciences to develop strategies for controlling circumventing or altogether avoiding the broad readership that print afforded Loath to Print explains how quickly a gap opened between those with scientific knowledge and a lay public and how such a gap persists today Scholars of the early modern period and the history of the book as well as those interested in communication and technology studies will find this an accessible and engaging look at the complexities of sharing scientific ideas in this rich period The Papers of the Bibliographical Society of America Bibliographical Society of America, 2005 The Eighteenth-century Current Bibliography, 2000 Journal of the Medical Library Association ,2005 Book Review *Index* ,2006 Every 3rd issue is a quarterly cumulation American Book Publishing Record ,2003 *Bibliographic* **Library Literature & Information Science** ,2005 An index to library and information science literature Index ,2007 Forthcoming Books Rose Arny, 2004 America, History and Life ,2007 Article abstracts and citations of reviews and dissertations covering the United States and Canada Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2006 International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences, 2005 The Saturday Review of Politics, Literature, Science
