Developing An Integrated Curriculum Using The Story Model:

Developing an Integrated Curriculum Using the Story Model Susan M. Drake, 1992 A Holistic Educator's Journey John P. Miller, 2021-08-01 This memoir describes the journey of John Jack Miller. The book explores how his personal journey is related to the work he has done in holistic education, contemplative education, and spirituality in education. In holistic education, the personal and professional are connected. Professor Miller's journey includes events, books, teachers, and the many factors in his life that have contributed to his work, which includes more than 20 books and extensive travel around the world. An example of the relationship between the personal and the professional is that Jack began meditating in 1974, and this practice has provided the foundation for much of his teaching and writing. Professor Miller's book *The Holistic Curriculum*, first published in 1988, along with the publication of the *Holistic Education Review*, have been seen as the beginning of holistic education as a field of study. Since his journey has been connected with so many other holistic educators, this book can serve as one perspective on how the field has unfolded over the past 35 years. Besides this historical perspective, the book includes a chapter on his meditation practice as well as his beliefs. There is also a chapter on his teaching and how he attempts to embody holistic education in his classroom. Praise for *A Holistic Educator's Journey*: Rarely does a field builder allow us the opportunity to journey into the life-long journey leading to the formation of the work. With bold transparency, Miller shares his enormously rich professional and personal journey of seven decades with an open hand. He shows us the terrain of his inner and outer life. Lisa Miller, Author, *The Spiritual Child*, Teachers College, Columbia University. Whether in the classroom, writing books, keynoting, or being a friend, Jack Miller's life journey exemplifies his multi-dimensional embracing of the way of nature and accepting of the mysterious. Always acknowledging the Indigenous roots of holistic education, he managed to bring parts of the Indigenous worldview into schools in ways that accommodated all cultures. This book gives testimony to his great contribution to understanding why we must return to our interconnected way of being. Four Arrows, Author, *Sitting Bull's Words for a World in Crisis*. *Critical Issues in Mathematics Education* Bharath Sriraman, Paul Ernest, Brian Greer, 2009-06-01 The word critical in the title of this collection has three meanings, all of which are relevant. One meaning, as applied to a situation or problem, is at a point of crisis. A second meaning is expressing adverse or disapproving comments or judgments. A third is related to the verb to critique, meaning to analyze the merits and faults of. The authors contributing to this book pose challenging questions from multiple perspectives about the roles of mathematics in society and the implications for education. Traditional reasons for teaching mathematics include preparing a new generation of mathematics researchers and a cadre of technically competent users of mathematics, training students to think logically, and because mathematics is as much part of cultural heritage as literature or music. These reasons remain valid, though open to critique, but a deeper analysis is required that recognizes the roles of mathematics in framing many aspects of contemporary society that will connect mathematics education to the lived experiences of students, their communities, and

society in general and that acknowledges the global ethical responsibilities of mathematicians and mathematics educators

The book is organized in four sections 1 Mathematics education For what and why 2 Globalization and cultural diversity 3 Mathematics education and society and 4 Social justice in and through mathematics education The chapters address fundamental issues such as the relevance of school mathematics in people s lives creating a sense of agency for the field of mathematics education and redefining the relationship between mathematics as discipline mathematics as school subject and mathematics as part of people s lives

Teaching from the Thinking Heart John P. Miller, Michele Irwin, Kelli Nigh, 2014-07-01 Forward by Nel Noddings This book includes papers written by teachers and how they engage holistic education in their classrooms The papers come from a course taught by Jack Miller at the Ontario Institute for Studies in Education at the University of Toronto entitled The Holistic Curriculum This is a rich and diverse collection of papers showing how holistic education can be brought into public education despite the pressures of testing and other accountability measures Although most of the teachers teach in public schools there are also examples from teachers working in private and post secondary settings This book can inspire other teachers who are looking for ways to teach the whole person in a more connected manner There are very few texts in the field of holistic education that include the voices and practices of teachers particularly those working in public schools Many of the examples of holistic education in practice come from Waldorf Montessori Reggio Emilia and alternative schools A unique feature of this book is the many different voices of teachers describing their work in the classroom they talk about their successes the challenges and even a few failures
