Developing Countries Jonathan E. Sanford, 2003 What is a developing country How does one know whether a country is actually developing or not This book looks at this issue from several perspectives Using a series of reports by various organisations it shows how countries rank in their levels of development according to different criteria Countries ranking high according to one measure may rank lower according to another It was once commonly believed that raising a country's average per capita income level would lead to improvements in most other areas Time and experience have shown however that social conditions and general well being of people may not necessarily improve when a country's average income level increases Countries with high levels of per capita income may rank lower in their social and structural development By contrast some poor countries rank with the advanced countries in their governance and levels of individual and economic freedom This book examines four criteria which are often used today to rank and assess countries levels of development They are per capita income economic and social structure social conditions and the prevailing level of economic and political freedom Specific indices or quantitative studies are explained and applied to each criteria and differences among the various measures are explained

Developing Nations and the Politics of Global Integration Stephan Haggard, 1995-04-01 Developing countries are becoming important players in the world economy Although they were slow to liberalize trade they are now joining the more economically advanced nations in implementing trade reforms and in taking steps to deepen global integration The lowering of trade barriers and the growth of foreign investment have benefited the developing countries but have also created vulnerabilities including risks of dependence and political interference Is deeper integration in the best interest of developing countries In this book part of the Integrating National Economies series Stephen Haggard examines the position of the developing countries in the international trade regime Focusing on the nations of East and Southeast Asia and Latin American Haggard explores the cause of economic liberalization policies in the developing nations He argues that various international constraints such as economic shocks and political pressures from the economically advanced nations pushed developing countries to open up to international competition and to pursue economic relations with advanced industrial states Haggard addresses such central questions as Will developing countries benefit from the deep integration agenda Will they instead join closed regional blocs that fragment the international economy Will the developing nations orient themselves toward the multilateral institutions particularly the World Trade Organization or will they gravitate toward regional arrangements Haggard argues that the advanced developing countries have become strong supporters of the multilateral system and that the extent of regionalism has been over stated He contends that a more serious threat is the lure of bilateralism and the effort of the advanced industrial states to impose standards on developing countries that are inappropriate or politically counterproductive A volume of Brookings Integrating National Economies Series **Developing**
