Developing Writers Second Edition:

Developing Writers Across the Primary and Secondary Years Honglin Chen, Debra Myhill, Helen Lewis, 2020-03-09

Writing development and pedagogy is a high priority area particularly with standardised testing showing declines in writing across time and through the years of schooling. However to date there are relatively few texts for teachers and teacher educators which detail how best to enable the children to become confident autonomous and agentic writers of the future. *Developing Writers Across the Primary and Secondary Years* provides cumulative insights into how writing develops and how it can be taught across years of compulsory schooling. This edited collection is a timely and original contribution addressing a significant literacy need for teachers of writing across three key stages of writing development covering early 4-7 years old primary, 7-12 years old and secondary years 12-16 years old in Anglophone countries. Each section addresses two broader themes: becoming a writer with a child-oriented focus and writing pedagogy with a teacher-oriented focus. Together the book brings to bear rigorous research and deep professional understanding of the writing classroom. It offers a novel approach conceiving of writing development as a dynamic and multidimensional concept. Such an integrated interdisciplinary understanding enables pedagogical thinking and development to address more holistically the complex act of writing.

Handbook of Writing Research, Second Edition Charles A. MacArthur, Steve Graham, Jill Fitzgerald, 2016-10-31. The definitive reference in the field, this volume synthesizes current knowledge on writing development and instruction at all grade levels. Prominent scholars examine numerous facets of writing from sociocultural, cognitive, linguistic, neuroscience, and new literacy technological perspectives. The volume reviews the evidence base for widely used instructional approaches including those targeting particular components of writing. Issues in teaching specific populations including students with disabilities and English learners are addressed. Innovative research methods and analytic tools are clearly explained and key directions for future investigation identified. **New to This Edition:** Chapters on genre instruction, evaluation and revision, argumentative writing, computer-based instruction and professional development. Chapters on new literacies, out-of-school writing, translation and self-regulation. Many new topics and authors including more international perspectives. Multiple chapters connect research findings to the Common Core writing standards. See also the editors' *Best Practices in Writing Instruction, Second Edition*, an accessible course text and practitioner's guide.
