Pace, 2022-05-31 This book provides a comprehensive resource and thorough treatment in the latest development of Digital RF Memory DRFM technology and their key role in maintaining dominance over the electromagnetic spectrum Part I discusses the use of advanced technology to design transceivers for spectrum sensing using unmanned systems to dominate the electromagnetic spectrum Part II uses artificial intelligence and machine learning to enable modern spectrum sensing and detection signal processing for electronic support and electronic attack Another key contribution is examination of counter DRFM techniques DRFM and transceiver design details and examples are provided along with the MATLAB software allowing the reader to construct their own embedded DRFM transceivers for unmanned systems It examines the design trade

offs in developing multiple structured false target synthesis DRFM architectures and aids in developing counter DRFM techniques and distinguish false target from real ones Written by an expert in the field and including MATLAB design software this is the only comprehensive book written on the subject of DRFM **Atlas of Digital Architecture** Ludger Hovestadt,Urs Hirschberg,Oliver Fritz,2020-10-26 Digital technology and architecture have become inseparable with new approaches and methodologies not just affecting the workflows and practice of architects but shaping the very character of architecture This compendious work offers a wide ranging orientation to the new landscape with its opportunities its challenges and its vast potential Contributing Editors Ludger Hovestadt Urs Hirschberg Oliver Fritz Contributors Diana Alvarez Marin Jakob Beetz Andr Borrmann Petra von Both Harald Gattermann Marco Hemmerling Ursula Kirschner Reinhard K nig Dominik Lengyel Bob Martens Frank Petzold Sven Pfeiffer Miro Roman Kay R mer Hans Sachs Philipp Schaerer Sven Schneider Odilo Schoch Milena Stavric Peter Zeile Nikolaus Zieske Writer Sebastian Michael atlasofdigitalarchitecture.com

**Handbook of Research on Digital Libraries: Design, Development, and Impact** Theng, Yin-Leng,Foo, Schubert,Goh, Dion,Na, Jin-Cheon,2009-02-28 This book is an in depth collection aimed at developers and scholars of research articles from the expanding field of digital libraries Provided by publisher Designed for Digital Jeanne W. Ross,Cynthia M. Beath,Martin Mocker,2019-10-01 One of Forbes s Top Ten Technology Books of the Year How to redesign big old companies for digital transformation and success with examples from 300 business leaders and 30 organizations including Amazon Uber LEGO and Toyota Most established companies have deployed such digital technologies as the cloud mobile apps the internet of things and artificial intelligence But few established companies are designed for digital Full of practical advice and real life examples of digital transformation this book is an essential guide for retooling organizations for digital success through 5 key building blocks Shared Customer Insights Operational Backbone Digital Platform Accountability Framework External Developer Platform In the digital economy rapid pace of change in technology capabilities and customer desires means that business strategy must be fluid As a result business design has become a critical management responsibility Effective business design enables a company to quickly pivot in response to new competitive threats and opportunities Most leaders today however rely on organizational structure to implement strategy unaware that structure inhibits rather than enables agility In companies that are designed for digital people processes data and technology are synchronized to identify and deliver innovative customer solutions and redefine strategy Digital design not strategy is what separates winners from losers in the digital economy Designed for Digital includes case studies from Amazon BNY Mellon DBS Bank LEGO Philips Schneider Electric USAA and many other global organizations Drawing on 5 years of research the book is an essential guide for companies that want to disrupt rather than be disrupted in the new digital landscape *Fabricate 2020* Jane Burry,Jenny E. Sabin,Bob Sheil,Marilena Skavara,2020-04-06 *Fabricate 2020* is the fourth title in the FABRICATE series on the theme of digital fabrication and published in conjunction with a triennial

conference London April 2020 The book features cutting edge built projects and work in progress from both academia and practice It brings together pioneers in design and making from across the fields of architecture construction engineering manufacturing materials technology and computation Fabricate 2020 includes 32 illustrated articles punctuated by four conversations between world leading experts from design to engineering discussing themes such as drawing to production behavioural composites robotic assembly and digital craft

**High Definition** ,2014-03-14 A pioneering title High Definition explores the onslaught of new and highly accurate digital metrology tools in large and small scale 3 D scanning and 3 D modelling Capable of measuring space to an accuracy of less than 1 mm these tools offer unprecedented precision for the development and interrogation of design before during and post production Over the last decade or so the array of designers digital tools to propose and make their ideas have evolved significantly but the absence of high accuracy zero tolerance design production has often remained the missing piece between design and fulfilment Innovative technologies are thus substantially recalibrating the way that designers operate in the world between the drawn and the made having the power to transform the architect's role from that of visualiser to one that is intensely involved with the realisation of objects and buildings High Definition will examine the capabilities of advanced technologies in design production through their impact on design theory practice and greater levels of collaboration between design and manufacturing It will permeate the entangled world between means and meaning and unravel a new understanding between the representation and production of architectural design Contributors include Philip Beesley Centre for Advanced Spatial Analysis Gehry Technologies Ruairi Glynn Zaha

**Digital Architecture Beyond Computers** Roberto Bottazzi, 2018-05-31 Digital Architecture Beyond Computers explores the deep history of digital architecture tracing design concepts as far back as the Renaissance and connecting them with the latest software used by designers today It develops a critical account of how the tools and techniques of digital design have emerged and allows designers to deepen their understanding of the digital tools they use every day What aesthetic spatial and philosophical concepts converge within the digital tools architects employ What is their history And what kinds of techniques and designs have they given rise to This book explores the answers to these questions showing how digital architecture brings together complex ideas and trajectories which span across several domains and have evolved over many centuries It sets out to unpack these ideas trace their origin and permeation into architecture and re examine their use in contemporary software Chapters are arranged around the histories of nine fragments each a fundamental concept embedded in popular CAD applications database layers and fields parametrics pixel programme randomness scanning topology and voxel maxel with each theme examined through a series of historical and contemporary case studies The book thus connects the digital design process with architectural history and theory allowing designers and theorists alike to develop more analytical and critical tools with which to conceptualise digital design and its software
