Strengthening the Credibility of Public Finances International Monetary Fund, 2021-10-13 Chapter 1 argues that fiscal policy should remain nimble and strengthen its medium term frameworks as countries face highly uncertain and differentiated prospects Vaccination has saved lives and is helping fuel a nascent recovery but risks are elevated amidst new virus variants high debt and poverty In advanced economies the shift in fiscal support toward medium term packages to build back better will have overall positive effects globally Emerging markets and low income developing countries face a more challenging outlook with permanent economic scarring and revenue losses They need international support to increase vaccine availability and financing to achieve the Sustainable Development Goals Many countries find themselves in a situation where fiscal support is still invaluable to protect lives and livelihoods At the same time governments are also facing questions on their elevated debt and gross financing needs Chapter 2 provides countries with guidance on how they can both avoid withdrawing fiscal support too early and yet signal to the public that their debt levels are sustainable in the long run To commit to future deficit reduction governments have several instruments including undertaking structural fiscal reforms such as pension reform or subsidies reform pre legislating changes to taxes or spending committing to fiscal rules that lead to deficit reduction in the future Countries that follow debt rules for instance manage to reduce debt faster than other

countries although fiscal rules should also provide enough flexibility to spend in times of need Overall governments that commit to sound public finances and that achieve high levels of fiscal transparency reap meaningful benefits their budgets are more credible their announcements are better perceived by the media and they pay lower interest rates on their debt

Public Finance in Developing Countries Vito Tanzi,1991 This lively and accessible book discusses the real world fiscal issues in developing countries within a realistic macroeconomic and social framework It represents the best synthesis currently available of the link between public finance and macroeconomics in developing countries with emphasis on positive rather than normative aspects The first part of the book emphasizes the reasons why normatively prescribed policy objectives are often not achieved The second part includes various chapters that show the close link that exists between developments in the public finances and in the macroeconomic situation of these countries The impact on inflation and of the real exchange rate on tax revenue is highlighted The third part discusses various aspects of taxation and the requirements for successful tax reform

OECD Economic Surveys ,1991 *The New Public Finance* Inge Kaul,Pedro Conceicao,2006-02-23 The world s agenda of international cooperation has changed The conventional concerns of foreign affairs international trade and development assistance are increasingly sharing the political center stage with a new set of issues These include trans border concerns such as global financial stability and market efficiency risk of global climate change bio diversity conservation control of resurgent and new communicable diseases food safety cyber crime and e commerce control of drug trafficking and international terrorism and weapons of mass destruction Globalization and increasing porosity of national borders have been key driving forces that have led to growing interdependence and interlocking of the public domains and therefore public policy concerns of countries governments private businesses civil society and people at large Thus new and different issues are now occupying top places on national policy agendas and consequently on the agendas of international negotiating forums The policy approaches to global challenges are also changing A proliferation and diversification of international cooperation efforts include focus on financing arrangements Financing of international cooperation in most instances is a haphazard and non transparent process and often seems to run parallel to international negotiations There are many unfunded mandates and many non mandatory funds To agree on and to achieve international economic goals we need to understand how financing of international cooperation efforts actually works Our understanding is hampered by two gaps 1 lack of an integrated and cohesive theoretical framework 2 lack of consolidated empirical and operational knowledge in the form of a comprehensive inventory of past current and possible future i e currently deliberated financing mechanisms This book reduces these two gaps and provides a guide to improve our ability to finance international cooperation Proceedings of the ... Public Financial Management and Its Emerging Architecture Mr.M. Cangiano, Ms.Teresa R Curristine, Mr.Michel Lazare, 2013-04-05 The first two decades of the twenty first century have witnessed an influx of innovations and reforms in public financial management The current wave of reforms is markedly different from those in the past owing to the sheer number of innovations their widespread adoption and the sense that they add up to a fundamental change in the way governments manage public money This book takes stock of the most important innovations that have emerged over the past two decades *The Reform of Intergovernmental Fiscal Relations in Developing and Emerging Market Economies* Anwar Shah, 1994 An important dimension of public sector reform in developing and emerging market economies has been the loosening of central control over the private sector and lower level governments The author's overview of the principles and best practices of fiscal federalism should help guide policy debates on restructuring intergovernmental fiscal arrangements Strong emphasis on central planning impedes innovative responses to local issues by local governments and stymies private sector development Decentralization should be the rule the author argues unless a strong case can be made for centralizing specific responsibilities Local public services can be provided more efficiently if expenditures more closely match local needs and preferences More closely linking benefits to costs also promotes accountability Increased fiscal autonomy can also help mobilize more revenue from local sources improving a country's fiscal position And decentralized decision making encourages local participation in development Constitutional responsibilities should be stated clearly and precisely Tax and spending assignments should be determined simultaneously so revenue means are matched as closely as possible to spending needs at each level of government In most developing countries subnational governments have limited access to their own tax bases and depend on higher level transfers A grant's design should reflect the situation and objectives The author gives examples Although most countries give a high priority to limiting interregional fiscal disparities no developing or transitional economy has adopted an explicit standard for equalization Revenue sharing should be supplemented by an equalization program with a specified standard rather than by combining several factors into one formula Local borrowing to meet capital expenditures is a major issue in most developing countries In such cases autonomous bodies can supervise and assist local borrowing for capital projects The decentralization of responsibilities and the rationalization of intergovernmental transfers

should be supported by strengthening local institutional capabilities Monitoring auditing and inspections functions in most developing nations especially need to be strengthened Transitional economies also need to give high priority to establishing or improving framework laws on property rights corporate legal ownership and control and bankruptcy and financial accounting and control Index of Economic Articles in Journals and Collective Volumes American Economic
