Systems Development David R. Benyon, Steve Skidmore, 2012-12-06 1 INTRODUCTION These proceedings are the result of a conference on Automating Systems Development held at Leicester Polytechnic England on 14 to 16 April 1987 The conference was attended by over 170 delegates from industry and academia and it represents a comprehensive review of the

state of the art of the use of the computer based tools for the analysis design and construction of Information Systems IS Two parallel streams ran throughout the conference The academic or research papers were the fruit of British European and Canadian research with some of the papers reflecting UK Government funded Alvey or European ESPRIT research projects Two important touchstones guided the selection of academic papers Firstly they should be primarily concerned with system rather than program development Secondly they should be easily accessible to delegates and readers We felt that formal mathematical papers had plenty of other opportunities for airing and publication The second stream was the applied programme a set of formal presentations given by leading software vendors and consultancies It is clear that many advances in systems development are actually applied rather than re search led Thus it was important for delegates to hear how leading edge companies view the State of the Art This was supported by a small exhibi tion area where certain vendors demonstrated the software they had intro duced in the formal presentation Measuring Information Systems Delivery Quality Duggan, Evan,Reichgelt, Johannes,2006-03-31 The book provides analyses and explains some of the contradictions and apparent paradoxes of many information systems quality perspectives Provided by publisher **Computerworld** ,1979-12-03 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network Managing Information Technology Resources in Organizations in the Next Millennium Information Resources Management Association.
