Development And Control Of Medicines And Medical Devices:

Development and Control of Medicines and Medical Devices Robin J. Harman, 2004 This new title describes the tests and processes undertaken to bring new medicines and medical devices to the market and the work of the government agencies which ensure products of the highest standard The text covers the controls to prove quality safety and efficacy prior to marketing and postmarketing pharmacovigilance requirements The different European registration processes for both medicines and medical devices are explained Important ethical issues in their development are also reviewed The role of the UK and pan European regulatory authorities for medicines and medicinal devices the MHRA and the EMEA and of the National Institute for Clinical Excellence NICE are explained A review of the ICH process and of the activities of the US FDA and the World Health Organization WHO in drug and device regulation illustrate how other countries control these products Providing a comprehensive single volume review *Development and Control of Medicines and Medicinal Devices* is an invaluable reference for all students undertaking healthcare studies and for all pharmacists It is also an essential source for all working in the pharmaceutical and medical devices industries and in government agencies involved in the control of medicines and medical devices

Pharmaceutical and Medical Device Safety Sonia Macleod, Sweta Chakraborty, 2019-02-21 This book examines how regulatory and liability mechanisms have impacted upon product safety decisions in the pharmaceutical and medical devices sectors in Europe the USA and beyond since the 1950s Thirty five case studies illustrate the interplay between the regulatory regimes and litigation Observations from medical practice have been the overwhelming means of identifying post marketing safety issues Drug and device safety decisions have increasingly been taken by public regulators and companies within the framework of the comprehensive regulatory structure that has developed since the 1960s In general product liability cases have not identified or defined safety issues and function merely as compensation mechanisms This is unsurprising as the thresholds for these two systems differ considerably regulatory action can be triggered by the possibility that a product might be harmful whereas establishing liability in litigation requires proving that the product was actually harmful As litigation normally post dates regulatory implementation the private enforcement of public law has generally not occurred in these sectors This has profound implications for the design of sectoral regulatory and liability regimes including associated features such as extended liability law class actions and contingency fees This book forms a major contribution to the academic debate on the comparative utility of regulatory and liability systems on public versus private enforcement and on mechanisms of behaviour control

Patient-focused Development of Biopharmaceutical Products Robert R. Nesbitt, Ramakrishna Venugopalan, Wolfgang Fraunhofer, 2025-10-25 This open access book builds the case for the business motivation techniques and approaches to use in development of a medicinal product for human therapy whether delivered via an oral dose form pill or solution or a delivery system device It shares the growing demands by patients and caregivers as well as regulators for designs which are most easily understood and usable and which can ensure

the medication can be consistently delivered and will therefore allow best outcomes The book weaves skills in human centered design into the design of medicinal delivery systems It would be a reference for those in academia studying pharmacokinetics formulation or product design and development as well as those in the development of biopharmaceutical therapies This is an open access book Medicines, Medical Devices and the Law John O'Grady,Ian Dobbs-Smith,Nigel Walsh,2011-06-16 This book provides information on the complex interrelations between medicines medical devices and the law
