Sönmez,Dallen J. Timothy,2001-04-30 Tourism has become the world s largest industry according to the World Tourism Organization no surprise when one considers that it incorporates the world s oldest profession In some developing regions such as the Caribbean or the South Pacific tourism is the primary sector in which significant economic growth takes place In other regions including areas of Latin America Africa the Middle East and formerly communist eastern Europe tourism is just beginning to take off In all of these areas tourism s impact has been decidedly mixed Nowhere is this more visible than in the context of women s roles in tourism The contributors demonstrate the many ways in which gender determines the roles they play as both tourists and providers of tourism as product and service A valuable contribution to tourism studies women s studies and the literature of economic development The premises of this unique collection of research are that women s roles in tourism are gendered just as are their other roles in gendered societies that tourism affects women differently than it affects men and that women themselves are affected in different ways by tourism depending on such factors as race region and class leisured consumer vs working producer or guest vs host The contributors cover theoretical perspectives including those provided by feminists and economic development analysts women s roles in tourism in the mature industries of the Caribbean Southeast Asia and the South Pacific women s roles in the less developed tourist destinations of the Middle East Latin America Africa and eastern Europe and implications for the future of economic development policy and of gender relations in tourism **Tourism Development** Peter M. Burns,Marina Novelli,2008 Making an empirical contribution to the understanding of tourism as a development mechanism in poor regions
