Development Genetics Epigenetics And Environmental Regulation:

Development V.E.A. Russo,D.J. Cove,L.G. Edgar,R. Jaenisch,F. Salamini,2012-12-06 Studies of selected model organisms have led to a greatly improved understanding not only of the molecular events which take place during development under the control of specific sets of genes but also of epigenetic and environmental influences on these processes This book gives an overview of all three of these levels and their relative importance and as such will give the reader a clear picture of one of the most exciting areas of current biological research Developmental Genetics of the Flower ,2006-09-29 Current major interests in this area include the study of higher level phylogenetic relationships and character evolution in the angiosperms floral evolution the genetic basis of key floral differences in basal angiosperms the genetic and genomic consequences of polyploid speciation conservation genetics of rare plant species and phylogeography Developmental Genetics of the Flower provides a series of papers focused on the developmental genetics of flowering as well as the genetic control of the timing of flowering Investigation of speciation mechanisms evolutionary relationships and character evolution in flowering plants and land plants utilizing a variety of experimental approaches are discussed The chapters are excellent reviews of the current fast moving area of research Provides a brief review of genes known to regulate flower development Articles emphasize the classic ABC model of flower development *The Epigenome and Developmental Origins of Health and Disease* Cheryl S. Rosenfeld,2015-10-10 Winner of 2016 BMA Medical Award for Basic and Clinical Sciences The Epigenome and Developmental Origins of Health and Disease synthesizes the existing knowledge on how the in utero environment could be the most important environment in shaping later risk for various diseases or to conversely promote the health of the offspring The book mines the existing literature from a variety of disciplines from toxicology to nutrition to epigenetics to reveal how contrasting maternal in utero environmental changes might be leading to epigenetic convergence and the resulting deleterious phenotypic and physiological effects in our offspring It is increasingly becoming apparent that even subtle changes in the mother s diet stress and exposure to low concentrations of toxic chemicals at levels deemed safe by the EPA and FDA such as endocrine disrupting compounds EDC can dramatically impact the health of our children possibly leading to metabolic cardiovascular immunological neurobehavioral disorders and increased risk for cancer to list but a few examples Informs how everyday choices pregnant women make can impact child development Ties together how in utero environmental changes may be inducing epigenetic changes in the offspring leading to overlapping phenotypes regardless of the initial insult toxic nutrition or stress Includes a boxed in area in each chapter for further references and resources to keep up with the field Features video interviews with the authors and other key leaders in the field **New Frontiers in Bryology** Andrew J. Wood,Melvin Oliver,David J. Cove,2004-04-30 The mosses Bryophyta Musci are a diverse and widely distributed group of land plants Mosses are attractive experimental plants because they exhibit the traditional attributes of good model systems Le ease of growth particularly when compared to tracheophytes such as *Arabidopsis thaliana* in which

these important plant phenotypes are either not clearly expressed or entirely lacking And in one of the most exciting developments in Plant Biology efficient homologous recombination occurs in the moss *Physcomitrella patens* The ability to perform efficient homologous recombination Le gene knock outs in *P. patens* is at present unique amongst all plants and represents an extremely powerful technique for the functional analysis of many plant genes Over the past 5 years a world wide community of moss researchers has evolved A highly successful Moss conference has been held annually 1998 Mumbai India 1999 Carbondale IL USA 2000 Villars Switzerland 2001 Okazaki Japan 2002 Ambleside UK 2003 St Louis MO USA with Moss 2004 planned to be held in Friburg Germany These conferences have been instrumental in the creation development of strong collaborative ties and the free exchange of both ideas and materials [Plant Breeding Reviews](#) Jules Janick, 2008-01-14 *Plant Breeding Reviews* presents state of the art reviews on plant breeding and genetics covering horticultural agronomic and forestry crops incorporating both traditional and molecular methods The contributions are authored by world authorities anonymously reviewed and edited by Professor Jules Janick of Perdue University USA The series is an indispensable resource for crop breeders plant scientists and teachers involved in crop improvement and genetic resources Initiated in 1983 *Plant Breeding Reviews* is published in the form of one or two volumes per year Recently published articles include Epigenetics and Plant Breeding v30 Enhancing Crop Gene Pools with Beneficial Traits Using Wild Relatives v30 Coffee Germplasm Resources Genomics and Breeding v30 Molecular Genetics and Breeding for Fatty Acid Manipulation in Soybean v30 Breeding Southern Highbush Blueberries v30 Development of Fire Blight Resistance by Recombinant DNA Technology v29 **Handbook of Life Course Health Development** Neal Halfon, Christopher B. The Character Concept in Evolutionary Biology Günter P. Wagner, 2000-10-31 Almost all evolutionary biologists indeed all biologists use particular features to study life These characteristics or features used by evolutionary biologists are used in a particular way to unravel a tangled evolutionary history document the rate of evolutionary change or as evidence of biodiversity Characters are the data of evolutionary biology and they can be employed differently in research providing both opportunities and limitations The Character Concept in Evolutionary Biology is about characters their use how different sorts of characters are limited and what are appropriate methods for character analysis Leading evolutionary biologists from around the world are contributors to this authoritative review of the character concept Because characters and the conception of characters are central to all studies of evolution and because evolution is the central organizing principle of biology this book will appeal to a wide cross section of biologists Focuses upon characters fundamental data for evolutionary biology Covers the myriad ways in which characters are defined described and distinguished Includes historical morphological molecular behavioral and philosophical perspectives *Journal of Cell Science*, 2000 *Translational Research Models and Methods for Mother-Infant Interactions and Developmental Studies* Josephine Johns, Rina Eiden, Elizabeth M. Byrnes, John H. Gilmore, Sheryl Moy, Joan I. Morrell, Linda Mayes, Karen Grewen, 2012-10-01 The disruption of mother infant interactions can have life long detrimental consequences for offspring and mothers This topic of Frontiers will focus on maternal infant interactions including factors that may affect or alter infant or child development and maternal response capability in clinical and preclinical animal populations Articles may highlight topics such as drug abuse maternal neglect altered reward systems stress biological and neural system development child and infant behavioral development genetics epigenetics and intergenerational studies Submissions can include research methods papers reviews original research articles techniques and opinion articles that address the topics of interest This Research Topic will highlight translational research including common measures and results found in both animal and human studies Please contact one of the Editors for submission proposals or for additional information *Epigenetics, Brain and Behavior* Paolo Sassone Corsi, Yves Christen, 2012-10-19 Recent years have seen spectacular advances in the field of epigenetics These have attracted the interest of researchers in many fields and evidence connecting epigenetic regulation to brain functions has been accumulating Neurons daily convert a variety of external stimuli into rapid or long lasting changes in gene expression A variety of studies have centered on the molecular mechanisms implicated in epigenetic control and how these may operate in concert It will be critical to unravel how specificity is achieved The focus of this volume is on critical epigenetic regulation and chromatin remodeling events that occur in the nervous system and on the presumed mechanisms that operate within neurons

to translate them into long lasting neuronal responses *Epigenetics* Bruce Stillman,David Stewart,2004 The importance of epigenetic regulation of gene expression particularly in higher organisms is now clear and the 2004 Cold Spring Harbor Annual Symposium provided many new examples as well as insights into the underlying mechanisms The resulting volume with over 60 papers from experts across the field covers various aspects of nuclear organization and dynamics genomic imprinting chromosomal inactivation and other examples of gene silencing the histone and DNA modifications associated with these conditions and the roles of RNA and protein regulators in establishing and maintaining these states *Annual Report* ,1999 **Proceedings of the National Academy of Sciences of the United States of America** National Academy of Sciences (U.S.),2007 **Scientific Report** Jackson Laboratory (Bar Harbor, Me.),1998 **Journal of Experimental Biology** ,2000 *The Jackson Laboratory* ,2000 *Drosophila Protocols* William Sullivan,M. Ashburner,R. Scott Hawley,2000 *Developmental Genetics* Gurbachan S. Miglani,2007 This book illustrates basic principles of development and related subject matter of genetics The main objective is to integrate two disciplines of development and genetics into one Thus it mainly deals with the role of genes in development **Mechanisms of Pattern Formation in the Wing Imaginal Disc of Drosophila** Craig A. Micchelli,1999 *Genetics Abstracts* ,2001
