Development In An Inflationary World:

Latin America vs East Asia: A Comparative Development Perspective Jingyuan Lin, 2019-07-25 This study makes a solid case for the now prevalent contention that the development model of East Asian NICs is less costly i.e. over inflation levels and more equitable income distribution more adaptive to fluctuating world market conditions eg successful adjustment to the two oil crises and more sustainable i.e. high growth rates even in the turbulent 1970s than that of the Latin American NICs In considering these issues this book examines the major Latin American countries economic problems and development experiences in light of the more successful stabilization and development experiences of the East Asian countries Taiwan and South Korea in particular

Monetary and Financial Policies in Developing Countries Anis Chowdhury, Akhtar Hossain, 2003-05-20 The issue of economic development and monetary stability has produced one of the most passionate debates in economic literature Yet much of the evidence employed in this debate is contradictory Monetary and Financial Policies in Developing Countries Growth and Stabilization brings together diverse views on the subject within a coherent framework The work includes a balanced assessment of empirical findings and their theoretical foundations on the role of money and growth a discussion of financial liberalization reform in developing countries an analysis of monetary policy as an instrument of economic stabilization an examination of the monetary supply and demand process in developing countries a study of the relationship between money credit the balance of payments inflation and the exchange rate system a reflection on market failures and the role of government

Global Development Finance 2006 World Bank, 2006-01-01 International private capital flows to developing countries reached a record net level of 491 billion in 2005 This surge in private capital flows offers national and international policy makers a major opportunity to bolster development efforts if they can successfully meet three challenges The first is to ensure that more countries especially poorer ones enhance their access to developmentally beneficial international capital through improvements in their macroeconomic performance investment climate and use of aid The second is to avoid sudden capital flow reversals by redressing global imbalances through policies that recognize the growing interdependencies between developed and developing countries financial and exchange rate relations in the determination of global financial liquidity and asset price movements And the third is to ensure that development finance both official and private is managed judiciously to meet the development goals of recipient countries while promoting greater engagement with global financial markets These are the themes and concerns of this year's edition of *Global Development Finance* Vol I Analysis and Statistical Appendix reviews recent trends in financial flows to developing countries Vol II Summary and Country Tables
