Burns, 2003-11-17 The first introductory A Z resource on the dynamic achievements in science from the late 1600s to 1820 including the great minds behind the developments and science s new cultural role Though the Enlightenment was a time of amazing scientific change science is an often neglected facet of that time Now Science in the Enlightenment redresses the balance by covering all the major scientific developments in the period between Newton's discoveries in the late 1600s to the early 1800s of Michael Faraday and Georges Cuvier Over 200 A Z entries explore a range of disciplines including astronomy and medicine scientists such as Sir Humphry Davy and Benjamin Franklin and instruments such as the telescope and calorimeter Emphasis is placed on the role of women and proper attention is given to the shifts in the worldview brought about by Newtonian physics Antoine Laurent Lavoisier's chemical revolution and universal systems of botanical and zoological classification Moreover the social impact of science is explored as well as the ways in which the work of scientists influenced the thinking of philosophers such as Voltaire and Denis Diderot and the writers and artists of the romantic movement Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Botanophilia in Eighteenth-Century France R.L. Williams, 2013-03-09 The book describes the innovations that enabled botany in the Eighteenth century to emerge as an independent science independent from medicine and herbalism This encompassed the development of a reliable system for plant classification and the invention of a nomenclature that could be universally applied and understood The key that enabled Linnaeus to devise his classification system was the discovery of the sexuality of plants The book which is intended for the educated general reader proceeds to illustrate how many aspects of French life were permeated by this revolution in botany between about 1760 to 1815 a botanophilia sometimes inflated into botanomania The reader should emerge with a clearer understanding of what the Enlightenment actually was in contrast to some popular second hand ideas today The History of Natural History Gavin D.
