

The background of the book cover is a photograph of an offshore oil and gas platform in the ocean. The platform is a complex of steel structures with various levels, ladders, and pipes. A tall derrick is visible on the left side of the platform. The ocean is a deep blue, and the sky is a lighter blue with some white clouds. The overall scene is industrial and maritime.

Development Of European Gas Markets Environmental Economic And Political Perspectives:

The Development of European Gas Markets Javier Estrada, Arild Moe, Kåre Dahl Martinsen, 1996-05-01 This volume studies the driving forces behind the development of the European gas market and the uncertainties facing the industry in Europe There is widespread consensus within Europe about the advantages of natural gas to reduce air pollution and to enhance energy supply diversification Thus taking into account these most fundamental prerequisites for increased gas demand this volume addresses the more immediate question of how the conglomeration and organisation of European gas industries will be influenced by this latent demand potential The purpose of this book is to focus both on the analysis of evolutionary organisational processes within the gas industry and the pressures for change provoked by external forces such as interfuel competition environmental imperatives and new trends in European economic policies The potential for structural change in the organisation of the European gas industry is discussed as well as the political economic and commercial factors affecting its progress With the present uncertainty as to whether the gas industry will take advantage of the obvious market opportunities that are opening up this book takes a close look at the European gas industry at this time of change and analyses how this process may develop and the possible implications this will have on the gas industry

Reshaping European Gas and Electricity Industries Dominique Finon, Atle Midttun, 2004-12-02 A unique and thorough investigation of the shift towards Europe wide energy regulation markets and business strategies and the extent to which energy systems have become more liberalised over this period *Reshaping of European Gas and Electricity Industries* analyses the key issues facing the European energy industry from a regulatory market and business perspective Current challenges within the field are also reviewed including competitive and environmental issues *Liberalization Delivers* timely insights into the changes facing the European energy industry in the face of deregulation *Competition* A direct look at business and marketing strategies in response to the influx of competition from across the globe *Environment* Provides powerful insights into the way environmentally based legislation has now become a key driver of the energy industry in Europe

The Routledge Companion to Network Industries Matthias Finger, Christian Jaag, 2015-11-19 In recent decades network industries around the world have gone through periods of de and re regulation With vast amounts of sometimes conflicting research carried out into specific network industries the time has come for a critical overarching assessment of this entire industry in order to provide a platform of understanding to aid future research and practice This comprehensive resource provides an orientation for academics policy makers and managers as to the main economic regulatory and commercial challenges in the network industries The book is split into sections covering market policy regulation management perspectives whilst all of the key network industries are covered including energy transport water and telecommunications Overseen by world class Editors and experts in the field this interdisciplinary resource is essential reading for students and researchers in international business industrial economics and the industries

The New Politics

of Energy Security in the European Union and Beyond Andrea Prontera, 2017-05-18 Combining theoretical reflections and empirical insights from paradigmatic case studies in the area of external energy governance pipeline politics Liquefied Natural Gas development and offshore petroleum policy and politics this ground breaking study demonstrates that a distinctive and new politics of energy security is definitively emerging in the European Union Innovative not only in regard to the case studies presented which include the Caspian region the Baltic Mediterranean countries Central Asia and EU Russia relations but also in regard to the analytical framework adopted an International Political Economy approach informed by an historical institutional perspective the book challenges the common view of the depoliticisation of energy security supported by the mainstream market approach and the power politics and zero sum game view supported by the geopolitical perspective This book places the study of EU energy politics in the broader evolving context of global energy markets and explores the complex interactions between EU and national political dynamics and between energy security and environmental concerns at the local level

Competition in Energy Markets Peter D. Cameron, Michael Brothwood, 2002 This is the second edition of a highly regarded work comprehensively analyzing the current state of European law in the energy sector It examines the relevant law and regulation in an integrated and objective manner The author draws on the insights of an expert advisory panel made up of senior practitioners regulators and academics in the sector to ensure that coverage is optimally directed to addressing the issues and problems arising in practice

Competition and Liberalization in European Gas Markets Jonathan P. Stern, 1998 This study traces the breakdown of market management in European gas markets and the emergence of gas to gas competition and liberalized access to networks A surplus of gas supply and pipeline capacity combined with institutional change to reduce monopoly power and bring new entrants into the industry are the most important drivers for change

The Bridge Thane Gustafson, 2020-01-07 A Marginal Revolution Best Book of the Year Winner of the Shulman Book Prize A noted expert on Russian energy argues that despite Europe's geopolitical rivalries natural gas deals based on it unite Europe's nations in mutual self interest Three decades after the fall of the Berlin Wall and the breakup of the Soviet empire the West faces a new era of East West tensions Any vision of a modern Russia integrated into the world economy and aligned in peaceful partnership with a reunited Europe has abruptly vanished Two opposing narratives vie to explain the strategic future of Europe one geopolitical and one economic and both center on the same resource natural gas In *The Bridge* Thane Gustafson an expert on Russian oil and gas argues that the political rivalries that capture the lion's share of media attention must be viewed alongside multiple business interests and differences in economic ideologies With a dense network of pipelines linking Europe and Russia natural gas serves as a bridge that unites the region through common interests Tracking the economic and political role of natural gas through several countries Russia and Ukraine the United Kingdom Germany the Netherlands and Norway *The Bridge* details both its history and its likely future As Gustafson suggests there are reasons for optimism but whether the gas bridge can ultimately survive

mounting geopolitical tensions and environmental challenges remains to be seen *Beyond the EU Regulatory State* Andrea Prontera, 2019-08-16 The EU's growing dependence on natural gas and Russian resources energy security has become a hot discussion topic in academia and in policy circles in Brussels Washington and many European capitals However most of the books on the subject use a very descriptive and or normative approach and very few attempt to theorise EU energy security outside of mainstream conceptualisations of the EU as an international actor This book closes an important gap in the literature and offers a fresh perspective on EU energy studies and it will be an important contribution to the debate on the development of European integration and the EU's role in international relations in the wake of the crisis in EU politics and in light of the EU's increasingly complex external environment Due to its interdisciplinary features the book combines EU studies international affairs political economy and energy studies and the topics covered this book will be of special interest to scholars of the international political economy of energy and to those interested in European politics and EU international relations *The New Europe* David Pinder, 1998-06-29 Covering both Western and Eastern Europe this updated version of *Western Europe Challenge and Change* offers a structured analysis of contemporary European issues and their geographical context *The Italian Natural Gas Market Evolution* Enrico Corali, 2001 *Gas to Europe* Robert Mabro, Ian Wybrew-Bond, 1999 This book analyses the strategies of four major national companies Gazprom Sonatrach Statoil and Gasunie that supply the expanding European gas market The strategies of these giant corporations are examined in the relevant historical perspective The analysis concludes by considering future developments of the market and of the supply policies of these main players *Oil and Gas: Europe's entanglement* Peter R. Odell, 2001 This second of two volumes on issues surrounding oil and gas examines a succession of fundamental changes in the European energy economy during the last 40 years Examined are the reasons why imported oil replaced indigenous coal as the primary energy source in the early post World War II period the discovery and exploitation of the North Sea basin's hydrocarbons resources and the evolution of the continent's natural gas markets from the early 1960s when it accounted for less than two percent of total energy used to the current contribution of more than 25 percent and an expected eventual share of 35 percent of Europe's energy supply These powerful and complex dynamics of Europe's energy sector are then put in the context of the broader political and economic structures and policies that have emerged over the last four decades **Energy Policy Volume 25 Number 1 January 1997**, 1997 *Bibliographie der Staats-und Wirtschaftswissenschaften*, 1996 *Encyclopedia of Energy: GI-Ma*, 2004 *The Kyoto Mechanisms and Russian Climate Politics* Arild Moe, Kristian Tangen, 2000 This paper argues that the Russian natural gas sector will be an important player in Russia's response to the Kyoto Protocol of 1997 It analyzes Russian climate policy and the special place of the natural gas sector and explores its potentially powerful combination with the Kyoto mechanisms *National Petroleum News*, 1998-07 *Contents of Recent Economics Journals*, 1997-12-19 *Monthly Bibliography* United Nations Library (Geneva, Switzerland), 1997 *Bibliographie der*
