

The background of the slide is a photograph of an open book. The pages are aged and yellowed, with some text visible but blurred. The lighting is warm and directional, coming from the upper right, which creates strong highlights on the right side of the pages and deep shadows on the left, emphasizing the texture of the paper and the spine of the book.

Development Of Imagery And Its Functional Significance In Henry James's Novels:

The development of imagery and its functional significance in Henry James's novels, 1959 *The Development of Imagery and Its Functional Significance in Henry James' Novels* Alexander Holder-Barrell, 1919 **The Development of Imagery and Its Functional Significance in Henry James' Novels** Alexander Holder-Barell, 1959 **The Development of Imagery and Its Functional Significance in Henry James's Novels** Alexander Holder-Barell, 1959 *The Development of Imagery and Its Functional Significance in Henry James's Novels* Alexander Holder-Barell, 1966 Proust's dictum that metaphor alone can give a sort of eternity to style finds its undeniable confirmation in James's work. The present study shows the development in James's application of imagery demonstrates how the functional significance of his metaphors underwent a similar development *Annual Bibliography of English Language and Literature* John Horden, 1973

Metaphors of Mind in Fiction and Psychology Michael S. Kearns, 2021-10-21 Curiosity about the human mind what it is and how it functions began long before modern psychology. But because the mind and its processes are so elusive they could be described only by means of metaphor. Michael Kearns in this prize winning study examines the development of metaphors of the mind in psychological writings from Hobbes through William James and in fiction from Defoe through Henry James. Throughout the eighteenth century and even into the early nineteenth metaphors of the mind as a relatively simple entity either mechanical or biological dominated both those engaged in psychological theorizing and novelists ranging from Richardson and Smollett through Dickens and the Brontës. In the nineteenth century such psychologists as Herbert Spencer and Alexander Bain conceived of the mind as a complex organism quite different from that embodied in earlier thinking but their figurative language did not keep pace. The result was a tension between theoretical expression and actual discussion of mental phenomena *The Turn of the Mind* Adré Marshall, 1998 James's narrative strategies are discussed in the context of the techniques employed by his literary predecessors. Illuminating comparisons are made with novelists such as Jane Austen and George Eliot and particular attention is paid to the French novelist Flaubert who was probably the most significant influence on James. The author examines James's stylistic devices in a selection of representative works from his early middle and late periods. Roderick Hudson *The Portrait of a Lady* and *The Golden Bowl* **The Caught Image** Robert L. Gale, 2012-06-01 Gale considers the imagery in all of the 135 novels and short stories of Henry James and presents what may well be the first extensive treatment of figurative language in the complete works of any novelist. All of the images have been recorded but the author does not claim too much for his deductions concerning them. Originally published in 1964. A UNC Press Enduring Edition. Desire and Repression Donna Przybylowicz, 1986 Books to Come; Bowker's Advance Book Reporting Service, 1960

Nietzsche, Henry James, and the Artistic Will Stephen Donadio, 1978 This pioneering contribution to the history of modern ideas connects two commanding figures ordinarily considered worlds apart. Observing that philosophy and fiction are two activities which have always sustained and offered criticisms of one another, Stephen Donadio sets out to explore the continuities of thought and feeling which link Nietzsche, a European philosopher whose work often appears to reflect a feverish attraction to extremity, and James, an American novelist commonly identified with decorous assertions of magisterial detachment. Moving beyond the boundaries of isolated literary and philosophical investigation, this wide-ranging study represents a breakthrough in our understanding of the relations between the phenomenon of modernism and the settled presuppositions of American imaginative life. Donadio points out the correspondences between the Nietzschean conception of the superman and more immediately familiar assumptions regarding American identity. In addition, he provides a compelling account of that moment in cultural history at the turn of the century which produced a radical new view of the relationship of art to life. Donadio shows that James and Nietzsche shared an intense belief in the power of art as the only activity capable of raising experience from insignificance. For both of them it was an activity requiring an unrelenting imposition of the will on the facts of experience, and they were accordingly joined in their resistance to the two dominant tendencies of the literature of their time: naturalism and art for art's sake. Perhaps most significantly, they shared an abiding sense of kinship with Emerson, whom Nietzsche named as the author as yet the richest in ideas in this century.
