Development And Change In Highland Yemen:

Development and Change in Highland Yemen Charles F. Swagman, **Development and Change in Highland Yemen** Charles F. Swagman, 1988 **A Political Anthropology of Yemen** Ross Porter, 2025-09-15 At a time when Yemen has been ravaged by a decade of war and subject to myriad political and military interventions the essays in this collection serve as a timely reminder of the need for grounded anthropological study in even the harshest of circumstances From tribesmen to refugees revolutionaries to farmers state workers to charity workers intellectuals to the unemployed and the destitute we learn of the everyday political languages through which people in the country live their lives This volume is a call for an anthropology attuned not only to locally significant political concepts but also to the ways in which people actively confront and reorient them while challenging their worlds and engaging the political imagination in a spirit of abiding critique This concise collection is the fruit of decades of ethnographic fieldwork in Yemen and will be of interest to students and scholars seeking an intimate and nuanced account of life in the country Arab Family Studies Suad Joseph, 2018-07-10 Family remains the most powerful social idiom and one of the most powerful social structures throughout the Arab world To engender love of nation among its citizens national movements portray the nation as a family To motivate loyalty political leaders frame themselves as fathers mothers brothers or sisters to their clients parties or the citizenry To stimulate production economic actors evoke the sense of duty and mutual commitment of family obligation To sanctify their edicts clerics wrap religion in the moralities of family and family in the moralities of religion Social and political movements from the most secular to the most religious pull on the tender strings of family love to recruit and bind their members to each other To call someone family is to offer them almost the highest possible intimacy loyalty rights reciprocities and dignity In recognizing the significance of the concept of family this state of the art literature review captures the major theories methods and case studies carried out on Arab families over the past century The book offers a country by country critical assessment of the available scholarship on Arab families Sixteen chapters focus on specific countries or groups of countries seven chapters offer examinations of the literature on key topical issues Joseph s volume provides an indispensable resource to researchers and students and advances Arab family studies as a critical independent field of scholarship Botanical Progress, Horticultural Innovation and Cultural Changes Michel Conan, W. John Kress, 2007 This book highlights religious artistic political and economic consequences of horticultural pursuits exploring the roles of peasants botanists horticulturists nurserymen and gentlemen collectors in these developments and offering a reflection on horticulture s future in the context of environmental devastation and ecological uncertainty **Historical Dictionary of Yemen** Charles Schmitz, Robert D. Burrowes, 2017-10-25 Yemen has experienced wrenching changes that have transformed the country in yet unknown ways The country exploded in a popular revolution against the long time rule of Ali Abdallah Saleh While the country appeared to slip toward civil war Yemeni political elite rallied with international backers to put together a transitional government with a

plan to revise the country's constitution. The transitional government began with a cautious sense of optimism and the prospect of substantial change for the better but ended in collapse because of a failure to govern. The politics of the street overran an ineffective transitional government that could not address the urgent concerns of Yemeni citizens for security and jobs. Instead, populist leaders exploited people's dissatisfactions and threw the country into civil war. The Houthi organization covertly allied with its former enemy Ali Abdallah Saleh to overthrow the transitional government and declare war on the rest of the country. Saleh seems unable to conceive of life outside of the Presidential Palace and his Houthi allies appear to believe they are destined to rule. Unfortunately, those opposed to Saleh and the Houthis also seem unable to provide effective rule in spite of massive backing from the Gulf States. The incompetence, infighting, and incoherence of the Hadi government bode equally ill for the future of the country. The one hope may be that a new generation of Yemeni leaders emerges to displace the dismal failures of this one. This third edition of *Historical Dictionary of Yemen* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1000 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Yemen.

Political Ecology and the Role of Water Gerhard Lichtenthäler, 2017-03-02. How can we explain the over-exploitation and degradation of natural resources in the countries of the South? Population growth, poverty, and problems associated with common property resource management have been common themes in this debate, yet insufficient attention has been paid to how traditional political relations and local perceptions affect natural resource capture and resource allocation. This is especially evident with respect to groups and communities at the political and geographical peripheries of state influence and control, for whom self-identity is constructed around notions of autonomy and food self-sufficiency. This informative book addresses this omission by discussing water resource allocation and management. It focuses in particular on the socio-economic and political contexts which influence approaches to and determine practices of water management. Taking the example of the tribal communities of the Sa'dah basin in the northern Yemen, it analyzes the politics of environmental change with particular reference to groundwater resource degradation within the conceptual framework of political ecology.

Historical Dictionary of Yemen Robert D. Burrowes, 2010. A small and extremely poor Islamic country, Yemen is located on the edge of the Arab world in the southernmost corner of the Arabian Peninsula. It was the product of the unification of the Yemen Arab Republic and the People's Democratic Republic of Yemen in May 1990. The location of the two Yemens on the world's busiest sea lane at the southern end of the Red Sea, where Asia almost meets Africa, gave them strategic significance from the start of the age of imperialism through the Cold War. More vital today is the fact that Yemen shares a long border with oil-rich Saudi Arabia and is a key to efforts both to spread and to end global revolutionary Islam and its use of terror. The second edition of the *Historical Dictionary of Yemen* has been thoroughly updated and greatly expanded. Through its list of acronyms and

abbreviations are a chronology an introductory essay a bibliography and over 800 cross referenced dictionary entries greater attention has been given to foreign affairs economic institutions and policies social issues religion and politics Labor and Rainfed Agriculture in West Asia and North Africa Dennis Tully, 2012-12-06 The basic objective of agricultural research at ICARDA is to enhance producer and consumer welfare through increasing the productivity stability and profitability of agriculture Improved practices must be technically economically and socially suitable to farmer conditions The rainfed areas of West Asia and North Africa have highly variable environmental conditions as well as complex social and economic structures In recent years the region has been experiencing major changes in the relative availabilities and costs of the classical factors of production land labor and capital These changes have important implications for the design of new agricultural technology On the one hand the availability of labor may be an important factor determining the acceptability of new technology On the other it is important to consider the impact that technology can have on rural employment To develop a better awareness of these issues and their relevance to technology development ICARD A initiated a project on Agricultural Labor and Tech nological Change The first stage of the project is published here it is a review of available literature on selected issues of regional importance com bined with more detailed analyses of the situations of eight countries with important rainfed agricultural sectors ICARDA greatly appreciates the financial assistance of the Ford Foun dation which allowed us to support the execution of the study and publi cation of its findings We also appreciate the great efforts of the authors in the face of often limited data and facilities *Social Change in a Yemeni Highlands Town* Thomas B.
