Development Economics Some Findings:

Development Economics; Some Findings Sateesh Kumar Singh, 1975 Monograph on the economics of economic development discussing models and methodology in mathematical analysis includes a bibliography pp 281 to 292 graphs references and statistical tables

Handbook of Development Economics Hollis Chenery, Hollis Burnley Chenery, 1988 Economics development concepts and approaches structural transformation human resources and labor markets planning and resource allocation international aspects country experience with development

The Pioneers of Development Economics Jomo Kwame Sundaram, 2005-09 A survey of the main influences on the development of modern development economics

Handbook of Development Economics Hollis Burnley Chenery, J. Behrman, T.N. Srinivasan, 1988 Handbooks of development economics edit Chenery v 1

International Handbook of Development Economics Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection

Ashwini Deshpande Economic and Political Weekly These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field

Highly recommended H A Faruq Choice This two volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field Authors are drawn from around the world and write on a wide range of topics After providing an introduction to the subject by examining issues like the meaning and measurement of development historical and interdisciplinary approaches empirical regularities and data problems the contributors provide a wealth of perspectives on and analyses of development economics They discuss alternative approaches to development the macroeconomics of growth factors and sources of economic development such as capital labor entrepreneurship resources and technology major sectors of concern such as agriculture industry services and the informal sector and international issues such as trade capital and labor flows and technology transfers Income distribution and poverty the state and other institutions and actual development experiences are explored The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives Scholars students policymakers and other development practitioners will all find this

comprehensive reference invaluable **New Directions in Development Economics** Mats Lundahl, Benno Ndulu, 2005-08-10 This volume is divided into two thematic parts economic growth or its absence in developing countries and contributions to the debate on the role of the state versus the market It outlines possible policy prescriptions of relevance both in the North and South *Planning with the semi-input-output method* A. Kuyenhoven, 2012-12-06 The semi input output method was introduced by Professor Jan Tinbergen in the early 1960 s in fairly obscure places in the economic literature The basic idea of the method is a very simple one and does not require lengthy and sophisticated exposition to be understood This fact together perhaps with Tinbergen s dislike for very formalized and technical analysis probably explains why he himself has never given a full exposition and elaboration of this method Nevertheless the concept did not remain unnoticed and authors such as B Hansen and some of Tinbergen s collaborators in particular P A Cornelisse and J Versluis have contributed to the elaboration of the method The present work by Dr A Kuyenhoven also a long time collaborator of Tinbergen has provided us with the first full and in my opinion definite exposition of the nature technique and use of the semi input output method now more than 15 years after the launching of the concept **Population Growth, Income Distribution, and Economic Development** Nico Heerink, 2012-12-06 In this book a model of long term interrelationships between income distribution population growth and economic development is developed and estimated from data for 54 countries The results indicate that a reduction of income inequality leads to lower fertility and mortality to improved basic needs satisfaction and to lower labour force participation of young and old males and of females in Asia and Africa The effect of income distribution on saving and consumption is found to be negligible These outcomes suggest that family planning and health policies in LDCs will show better results when they are supplemented with policies aimed at making the poor benefit from economic growth As regards development policy the results indicate that a reduction of income inequality does not impair the formation of physical capital but enhances the formation of human capital and lowers the growth rate of the labour force Public Finances During the Korean Modernization Process Roy Bahl, Chuk Kyo Kim, Chong Kee Park, 2020-03-17 This final volume in the series Studies in the Modernization of the Republic of Korea 1945 1975 is an analysis of the contribution of tax and expenditure policy to Korea s rapid economic development during the 1953 1975 period Based upon specially compiled and comprehensive revenue and expenditure data the authors first trace the history of Korean fiscal policy during the modernization period and then examine how Korea s fiscal development has differed from that of other countries The results of the analysis show that Korea did not follow the traditional path of a steadily increasing tax effort reliance on direct taxes and emphasis on income distribution Instead through improved tax administration and expenditure control the savings rate was increased dramatically Tinbergen and Modern Economics K.
