**The Development of Florentine Humanist Historiography in the Fifteenth Century** Donald J. Wilcox, 1969

Presenting a new interpretation of humanist historiography Donald J Wilcox traces the development of the art of historical writing among Florentine humanists in the fifteenth century He focuses on the three chancellor historians of that century who wrote histories of Florence Leonardo Bruni Poggio Bracciolini and Bartolommeo della Scala and proposes that these men especially Bruni had a new concept of historical reality and introduced a new style of writing to history But he declares their great contributions to the development of historiography have not been recognized because scholars have adhered to their own historical ideals in judging the humanists rather than assessing them in the context of their own century Mr Wilcox introduces his study with a brief description of the historians and historical writing in Renaissance Florence He then outlines the development of the scholarly treatment of humanist historiography and establishes the need for a more balanced interpretation He suggests that both Hans Baron s conception of civic humanism and Paul Oscar Kristeller s emphasis on the rhetorical character of humanism were important developments in the general intellectual history of the Renaissance and more specifically that they provided a new perspective on the entire question of humanist historiography The heart of the book is a close textual analysis of the works of each of the three historians The author approaches their texts in terms of their own concerns and questions examining three basic elements of their art The first is the nature of the reality the historian is recounting Mr Wilcox asks What interests the writer What is the substance of his narrative What does he choose from his sources and what does he ignore What does he interpolate into the account by drawing on his own understanding of the nature of history The second is the various attitudes moral judgments historical conceptions analytical views with which the historian approaches his narrative And the third is the aspect of humanist historiography to which previous scholars have paid the least attention the historian s narrative technique Mr Wilcox identifies the difficulties involved in expressing historical ideas in narrative form and describes the means the historians developed for overcoming those difficulties He emphasizes the positive value of rhetoric in their works and points out that they sought by eloquence to teach men virtue He devotes three chapters to Bruni whom he considers the most original and important of the three historians The next two chapters deal with Poggio and the last with Scala Throughout the book Mr Wilcox exposes the internal connections among the three histories thus illustrating the basic coherence of the humanist historical art

**Development of Florentine Humanist Historiography ... 15th Century** Donald J. Wilcox, 1969 **The Study of History**, 1988 The chief objective of this text is to provide a handy reference guide for teachers students and researchers of modern European economic and social history Since the bibliography covers only works written in the English language it will probably be of less use to the last named group at least insofar as those within it are already seasoned researchers on a particular country or topic However it would have been quite impossible from the point of view of length to have included all the literature in foreign languages while to have done so would have defeated the essential aim of the volume namely that of providing a reasonably convenient guide for those who teach and study the subject but who are not primarily specialists in the field

**A History of Political Thought** Janet Coleman, 2000-06-22 This volume continues the story of European political theorising by focusing on medieval and Renaissance thinkers It includes extensive discussion of the practices that underpinned medieval political theories and which continued to play crucial roles in the eventual development of early modern political institutions and debates The author strikes a balance between trying to understand the philosophical cogency of medieval and Renaissance arguments on the one hand elucidating why historically suited medieval and Renaissance thinkers thought the ways they did about politics and why we often think otherwise

**The Making of the Humanities** Rens Bod, Jaap Maat, Thijs Weststeijn, 2025-10-01 This book is the first step towards the development of a comparative history of the humanities Specialists in philology musicology art history linguistics literary theory and other disciplines highlight the intertwining of the various fields and their impact on the sciences This first volume in the series The

Making of the Humanities focuses on the early modern period Different perspectives reveal how the humanities developed from the liberal arts via the curriculum of humanistic schools to modern disciplines The authors show in particular how discoveries in the humanities contributed to a secular world view pointing up connections with the scientific revolution The main themes are the humanities versus the sciences the visual arts as liberal arts humanism and heresy language and poetics linguists and logicians philology and philosophy the history of history Contributions come from a selection of internationally renowned European and American scholars including Floris Cohen David Cram and Ingrid Rowland The book offers a wealth of insights for specialists students and those interested in the humanities in a broad sense      **Humanistic Historiography**

**Under the Sforzas** Gary Ianziti,1988 Seeking to establish the city of Milan as a major center of Renaissance Italian humanism this book explores the methods concerns and attitudes that influenced the humanist approach to the writing of history there Ianziti focuses on the two works about Francesco Sforza written by his chancery employees Crivelli and Simonetta and considers the radical and innovative features of their work that evolved in response to a specific set of political circumstances This unique focus provides not only a convincing argument for the evolution of humanist methods of historical writing in the latter half of the 15th century but also a fresh look at the relationship between politics and culture in the Renaissance      Chronicling History Sharon Dale,2007-01-01 Literally thousands of annals chronicles and histories were produced in Italy during the Middle Ages ranging from fragments to polished humanist treatises This book is composed of a set of case studies exploring the kinds of historical writing most characteristic of the period We might expect a typical medieval chronicler to be a monk or cleric but the chroniclers of communal and Renaissance Italy were overwhelmingly secular Many were jurists or notaries whose professions granted them access to political institutions and public debate The mix of the anecdotal and the cosmic of portents and politics makes these writers engaging to read While chroniclers may have had different reasons to write and often very different points of view they shared the belief that knowing the past might explain the present Moreover their audiences usually shared the worldview and civic identity of the historians so these texts are glimpses into deeper cultural and intellectual contexts Seen more broadly chronicles are far more entertaining and informative than narratives They become part of the very history they are describing      Sylvester Syropoulos on Politics and Culture in the Fifteenth-Century Mediterranean Fotini Kondyli,Vera Andriopoulou,Eirini Panou,Mary B.

Cunningham,2016-09-17 The Memoirs of Sylvester Syropoulos is a text written by a yzantine ecclesiastical official in the 15th century Syropoulos participated in the Council for the union of the Greek and Latin Churches held in Ferrara and Florence Italy in 1438 1439 As a high ranking official and an eye witness of the union he offers a unique perspective on this important political and religious event that would so decisively contribute to the political military and religious development of Europe at the end of the Middle Ages Experts in different fields historians philologists art historians and archaeologists have come together in this volume to explore the actions and motives of the various political and religious groups that participated in

the council With Syropoulos as their starting point the contributors of this volume reconstruct the living conditions cross cultural interaction artistic and commercial exchange in the 15th century Mediterranean At the same time they discuss the text as an invaluable source for political and diplomatic affairs at that time as a travel account an eye witness narrative and as a literary work Emphasis is placed on Syropoulos s Section IV where he describes the journey of the Byzantine delegation from Constantinople to Italy their stay in Venice and in Ferrara the diplomatic contacts with the doge and the pope and finally the beginning of the council s proceedings An annotated English translation of the text is included as an appendix to the book The papers bring out the richness of the information in Syropoulos s writings about the people involved in the Council of Ferrara Florence and especially the interaction among different social religious and political groups throughout that event His work is unique because it is a rare eye witness account deriving from personal experience rather than an objective historical narrative *Journal of Historical Studies* ,1968 **Renaissance Humanism: Humanism and the disciplines** Albert Rabil,1988 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas **The Publishers' Trade List Annual** ,1986 **The Huntington Library Quarterly** Henry E.
