Social Media and the Law Daxton Stewart, Daxton R. Stewart, 2017-02-10 Social media platforms like Facebook Twitter Instagram YouTube and Snapchat allow users to connect with one another and share information with the click of a mouse or a tap on a touchscreen and have become vital tools for professionals in the news and strategic communication fields But as

rapidly as these services have grown in popularity their legal ramifications aren't widely understood To what extent do communicators put themselves at risk for defamation and privacy lawsuits when they use these tools and what rights do communicators have when other users talk about them on social networks How can an entity maintain control of intellectual property issues such as posting copyrighted videos and photographs consistent with the developing law in this area How and when can journalists and publicists use these tools to do their jobs without endangering their employers or clients Including two new chapters that examine First Amendment issues and ownership of social media accounts and content Social Media and the Law brings together thirteen media law scholars to address these questions and more including current issues like copyright online impersonation anonymity cyberbullying sexting and live streaming Students and professional communicators alike need to be aware of laws relating to defamation privacy intellectual property and government regulation and this guidebook is here to help them navigate the tricky legal terrain of social media **The Routledge**

- Multilingual Support

Get this book now to unlock the full potential of AI in customer service and transform your customer experience for the digital age. Become an AI-savvy leader and drive your business to new heights.

Improve customer experience with chatbots Beata Stefanowicz, 2023-02-13 We have come a long way in the past 70 years since chatting to a computer was first mentioned. A chatbot is a computer program that communicates with human users over text or through a speech-to-text system. Businesses can use chatbots to communicate with their customers and recreate the in-store shopping experience online. E-commerce companies can do this by:

- Welcoming visitors to their online store.
- Offering support within arm's reach.
- Showing personalized deals.
- Using proactive sales techniques.
- Helping customers find the right products.
- Upselling items and services.
- Handling complaints on auto-pilot.
- Offering membership cards.
- Collecting feedback from shoppers.
- Offering multilingual support.

Many e-commerce brands are already taking advantage of chatbots to get ahead of their competitors. Why not try them for yourself and see what this technology can do for your business?

Increase sales and lead generation with AI and chatbots Krzysztof Wroblewski, 2023-07-10 To grow your e-commerce business, you need to gain more clients. And to achieve it, you have to provide high-quality customer experience.

Sounds logical But the more visitors on your website the more questions your support agents have to handle And here is the challenge you need to face to successfully grow your store How to serve more clients answer more questions and maintain the highquality of support at the same time There are two ways The first is to constantly hire new support agents It probably will work but the cost you ll have to take for constantly recruiting and training new employees will be huge The second way is connected to technology that took the ecommerce industry and not only this one by a storm and will stay with us for a long time If not forever The AI

AI Agents vs. AI Chatbots: A Strategic Guide for B2B Customer Service Branislav Bozanic,2025-04-01 In 2021 Uber was expanding at a staggering rate but growth came at a cost After pandemic related restrictions eased the multinational American transportation company faced severe driver shortages and

regulatory hurdles that slowed the hiring of new drivers Wait times surged prices fluctuated and customer frustration grew One of the biggest bottlenecks was due to customer support The high volume of tickets coming in across multiple channels required manual processing And therein lay their problem Even Uber couldn't keep up with all the customer support demands This resulted in slow response times inconsistent resolutions and high operational costs However their team didn't panic There was an obvious solution AI driven technologies More precisely an AI powered robotic process automation RPA system Uber quickly implemented RPA to categorize tickets and handle repetitive and time consuming customer support tasks The results Processing time for common issues dropped from days to minutes Customer satisfaction skyrocketed with faster response times Cost savings were massive with the company revenue growing from 17 to 32 billion US dollars the following year 1 Thanks to chatbots and now AI agents automating customer service is getting easier cheaper and more scalable These digital assistants can answer customer questions and automate simple tasks based on a specific set of data But only one of them can also make dynamic decisions plan actions and even learn from experiences offering unparalleled service Curious to know which one is the all around solution that is more suitable for the B2B ecosystem This ebook aims to demystify the differences between AI Agents and AI Chatbots provide their respective benefits and help businesses make the right choice according to their unique customer service requirements
