*Large Language Models* Oswald Campesato, 2024-10-02 This book begins with an overview of the Generative AI landscape distinguishing it from conversational AI and shedding light on the roles of key players like DeepMind and OpenAI. It then reviews the intricacies of ChatGPT, GPT-4 and Gemini, examining their capabilities, strengths and competitors. Readers will also gain insights into the BERT family of LLMs including ALBERT, DistilBERT and XLNet and how these models have revolutionized natural language processing. Further, the book covers prompt engineering techniques essential for optimizing the outputs of AI models and addresses the challenges of working with LLMs, including the phenomenon of hallucinations and the nuances of fine-tuning these advanced models. Designed for software developers, AI researchers and technology enthusiasts with a foundational understanding of AI, this book offers both theoretical insights and practical code examples in Python. Companion files with code figures and datasets are available for downloading from the publisher.

*Multidisciplinary Approaches in AI, Creativity, Innovation, and Green Collaboration* Fields, Ziska, 2023-05-01 Creativity must be turned into innovation that adds value and leads to strategic action. Innovation is often associated with Silicon Valley, expensive research and development departments and expensive commercialization that primarily benefits a small portion of the world's population. A small portion of the world's population working together to solve wicked green problems is not enough; either green creativity and eco-innovation are necessary to help solve green problems by making products and services available and affordable to the masses. *Multidisciplinary Approaches in AI, Creativity, Innovation and Green Collaboration* focuses on the importance of green creativity, eco-innovation and collaboration to create a more sustainable world. It builds on the available literature and joint expertise in the field of management while providing further research opportunities in this dynamic field. Covering topics such as eco-leadership, green marketing and social responsibility communication, this premier reference source is a comprehensive and timely resource for government officials, decision makers, business leaders and executives, students and educators of higher education, librarians, researchers and academicians.

**A Slow Approach to Visual Literacy in Higher Education** Dana Statton Thompson, Stephanie Beene, 2025-04-10 The principles of slow librarianship, which prioritizes reflection, collaboration, solidarity and valuing all kinds of contributions, can also support deeper and more sustained learning and understanding. This book emphasizes the importance of attention and focus to the process of visual literacy, demonstrating how this approach supports ACRL's Visual Literacy Competency Standards for Higher Education and the Framework for Visual Literacy in Higher Education. Library workers, educators and instructors will discover dozens of flexible lesson plans for teaching visual literacy, scaffolded by competency levels: novice, intermediate and advanced. Ways to integrate slow looking into the classroom, emphasizing careful observation and the sustained act of looking, techniques for showing learners how to select images with intention as well as carefully determine when and how to share those images, reasons why slow creating is essential to understanding and applying visual literacy in the twenty-first century and a look at

how increasing access to internet connectivity generative artificial intelligence AI and new ethics for sharing and using information online will affect the future of visual literacy
